- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Persian-language entertainment portal branded as Up TV, providing film and television discovery, online viewing, downloads, Persian-dubbed productions, animation, anime, IMDb-ranked selections, release updates, and editorial entertainment content.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or confirmed malicious classification were observed. The homepage presents a coherent entertainment service, contains no login or sensitive-data form, and shows no wallet, cryptocurrency, clipboard-hijacking, cloaking, or hidden-form behavior. Its extensive historical presence and substantial global audience footprint strongly support the conclusion that this is a legitimate, established content portal. One external reputation engine produced an isolated suspicious assessment, but this is not corroborated by malicious detections, reported infrastructure abuse, or broader page-level fraud indicators.

- The homepage contains substantial Persian-language film, series, animation, anime, dubbing, ranking, and editorial content, with no detected brand-impersonation indicators.
- The domain has 964 archive snapshots spanning 2011–2026, representing 16 years of tracked history, with no established semantic repurposing.
- The site holds global traffic rank 8,862, placing it within the upper tier of measured web traffic.
- Interactive testing completed 2 of 2 runs successfully and detected no login form, hidden form, external password submission, cloaking, wallet access, or clipboard manipulation.

Regulatory Verification Notes

The supplied homepage does not establish a named operating legal entity, content-rights holder, or media-licensing framework. For an entertainment portal, this is a minor disclosure limitation rather than evidence of fraud or a financial-regulatory concern; the site makes no investment, brokerage, token, or other regulated financial-service claims. Registration privacy through MyPrivacy.net Ltd. is an administrative arrangement and does not undermine the site's demonstrated legitimacy. No matching broker record was identified, which is consistent with the site's non-financial business model.

- The current domain registration was created in 2017 (~9.18 years old), is registered through easyDNS Technologies, Inc., and expires on 2027-05-29.
- The homepage identifies the service as an entertainment streaming and download portal but does not display a legal-entity name or media-rights statement in the supplied content.

- The site is served from AS34918 by Pishgaman Toseeh Ertebatat Company in Iran.
- The site's transport encryption uses a valid YR1-issued DV TLS certificate, valid to 2026-10-10.

What to Verify Next

Organizations considering advertising, distribution, syndication, or other commercial engagement should obtain the operator's legal name and contracting details, confirm its authority to distribute the relevant media catalogue, and document applicable copyright and territorial permissions. Official contact channels should be confirmed independently before entering a commercial agreement. Routine viewing, navigation, and standard account interaction remain appropriate.

- The homepage offers direct download and online-viewing functions, making content-distribution authority relevant to commercial due diligence.
- The site navigation includes a contact route, but the supplied page material does not provide corresponding contracting or rights-management details.
- The catalogue includes Iranian and international films, television series, Persian-dubbed works, animation, and anime, implying potentially varied territorial and licensing arrangements.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity as a mature entertainment portal is supported by strong convergence across historical continuity, audience adoption, stable operation, substantive page content, and clean fraud-oriented observations. Normal interaction, including standard use and ordinary account login where available, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin address and does not use a detected CDN or WAF. This is a conventional direct-hosting posture rather than an adverse trust signal; the identified infrastructure is stable, and no abuse reports were recorded for the hosting address.

Closing Assessment

Prospective users may engage with the service normally, while commercial counterparties should complete standard contractual and content-rights due diligence before forming a business relationship.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of uptvs.com.

- The request stayed on uptvs.com. It was not redirected to another domain. CLEAR
- Registration is published under easyDNS Technologies, Inc.. CLEAR
- DNS for this domain is served by hostiran.net, across 2 name servers. NOTED
- The registration is paid up to 2027-05-29. NOTED
- The earliest public archive of this site is from 2011-02-01. CLEAR
- It is hosted on PISHGAMAN-DATACENTER, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uptvs.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
