

Is usach.cl legit? TrustSniffer's high-trust assessment: 100/100

usach.cl

Verdict

100

OUT OF 100

HIGH TRUST

usach.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

University site for Universidad de Santiago de Chile with navigation for students, staff and public, covering admissions, programs, research news, events and contact details. Mostly Spanish content and accessible resources.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the public-facing online presence of Universidad de Santiago de Chile, presenting academic programs, admissions information, student and staff services, research and institutional news, events, administrative resources, and contact information for students, personnel, graduates, and the wider public.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent university identity and an informational education model, with no detected phishing, brand-impersonation, malicious-content, or consumer-sales indicators. Behavioral observations included external requests and page changes during interaction, but no hidden forms, sensitive-form submissions, wallet activity, clipboard manipulation, or cloaking were detected; these observations do not establish an abuse pattern. The real-world operator remains independently unverified, so the institutional presentation should be treated as apparently legitimate rather than identity-proven.

EVIDENCE

- The homepage identifies Universidad de Santiago de Chile and provides structured navigation for students, academics, graduates, staff, communications, admissions, programs, research, and administrative services.
- Independent reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist or phishing hit.
- The behavioral review recorded 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 clipboard-write events.

Regulatory Verification Notes

The reviewed content is consistent with a public university website rather than a consumer financial or trading service. No license claim, licensing authority, or registration number is presented in the supplied site content; for an academic institution, this is a disclosure and verification matter rather than evidence of deception. The available evidence supports an established, apparently legitimate institutional presence, while independent confirmation of the legal operator and any applicable educational authorization remains outstanding. No adverse third-party broker match was identified.

EVIDENCE

- The homepage's stated functions comprise admissions, academic offerings, student services, research and institutional communications rather than direct consumer sales or financial services.
- The site is served through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-09-15T20:47:16+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm that the domain is the institution's official digital channel through contact details published by an authoritative university or public-sector source. Confirm the applicable educational authorization or institutional registration through the relevant official registry, and ensure that any tuition or service payment uses an institution-controlled payment process with normal payment-protection and dispute mechanisms. Contact channels should also be confirmed through an independent route rather than relying solely on information reached from the website.

EVIDENCE

- The homepage provides institutional navigation for admissions, enrolment, online payments and services, academic records, employment, welfare, and contact-related functions.
- The reviewed page contains 0 forms and no sensitive form or untrusted form destination.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk university website. No scam, phishing, impersonation, or other contradictory signals were observed, supporting a high-trust posture; however, the real-world operator identity is not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than an exposed origin address. This reduces direct origin exposure and is a mitigating control, but protective hosting infrastructure alone does not prove institutional ownership.

EVIDENCE

- Four observed addresses were identified as Cloudflare CDN edge infrastructure, with 0 likely origin addresses.
- The hosting provider is CLOUDFLARENET - Cloudflare, Inc., US, operating through AS13335.

Closing Assessment

Normal informational use is proportionate to the evidence; before submitting credentials or making payments, ordinary independent checks of institutional identity, authorization, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of usach.cl.

- The request stayed on usach.cl. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about usach.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
