

Is userway.org legit? TrustSniffer's high-trust assessment: 90/100

userway.org

Verdict

90

OUT OF 100

HIGH TRUST

userway.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 65%.

What this site appears to be

UserWay accessibility/cookie consent page describing cookies used, third-party providers, and consent options. Contains lists of cookies, storage durations, and mentions of integrations such as Calendly, Stripe, HubSpot, Hotjar and analytics/ad partners.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is UserWay, a professional SaaS platform presenting web accessibility widgets, compliance tooling, and consent-management services for organizations. Its apparent business model is based on product subscriptions and service contracts, supported by operational integrations for payments, analytics, scheduling, and customer engagement.

Scam/Impersonation Risk

No contradictions were observed. Available checks identified no phishing, impersonation, blacklist, or malicious-content indicators, while the page review found no red flags, hidden forms, or sensitive login form. The site's substantial and continuous public history is consistent with an established web presence rather than a newly created or repurposed operation.

EVIDENCE

- Domain registration: created 2016-07-10 through GoDaddy.com, LLC; registered 10.1 years.
- Web archive: 5,000 snapshots spanning 2017-01-20 to 2025-08-12, covering 9 years with a maximum recorded gap of 1 year.
- Homepage analysis: "UserWay | Web Accessibility Solutions," with no detected phishing or brand-impersonation indicators and no sensitive form.

Regulatory Verification Notes

The About, Contact, Cookie Policy, and Request Demo pages present a coherent commercial service offering and explain consent categories, storage durations, data transfers, and third-party integrations including Calendly, Stripe, HubSpot, and Hotjar. The available evidence does not independently verify the real-world operator identity, and no licensing claim or registration number is presented; for an accessibility software provider, this is a disclosure and applicability question rather than evidence of deception. External reputation checks were clean, the site has a top-tier global traffic footprint, and page-authority signals are established. A third-party broker dataset produced no match, which is contextual reputation information and not a licensing determination.

EVIDENCE

- Hosting telemetry: served from AS16509, Amazon.com, Inc., US.
- Transport security: TLS certificate issued by Amazon RSA 2048 M01, validation level DV, valid to 2026-10-19.
- Cookie Policy page: documents necessary, preference, statistics, and marketing consent categories, including stated third-party data transfers.
- Homepage and linked social presence: the site is ranked 2305 globally and links to established social platforms including LinkedIn, Facebook, TikTok, Twitter, and t.co.

What to Verify Next

Before credential submission or payment for a service contract, an organization should independently match the operator named in commercial documentation with a relevant corporate or business registry, confirm the applicable contractual and service terms, and validate official contact routes through an independent channel. Payment arrangements should also be checked for appropriate protections and dispute rights before funds are committed.

EVIDENCE

- About and Contact pages: use these pages as the primary locations for confirming the contracting entity and official communication routes.
- Request Demo page: confirm that any submitted business information is directed to the expected service provider and consistent with the proposed commercial engagement.
- Cookie Policy page: review the stated third-party processing and consent controls before approving organizational deployment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The operator connection remains likely rather than independently verified, so the legitimacy assessment is evidence-consistent rather than proven.

Infrastructure Integrity

The site is delivered through Amazon content-delivery infrastructure, providing a mitigating edge-layer control for availability and network exposure. This infrastructure is supportive of operational maturity but is not, by itself, proof of operator legitimacy.

Closing Assessment

Normal business evaluation is proportionate, with independent identity, contractual, and payment-protection checks completed before credentials or payment details are exchanged.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of userway.org.

- The request stayed on userway.org. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-48.org, across 4 name servers. NOTED
- The registration is paid up to 2027-07-10. NOTED
- The earliest public archive of this site is from 2017-01-20. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about userway.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
