

Is usezapay.com.br legit? TrustSniffer's high-trust assessment: 90/100

usezapay.com.br

Verdict

90
OUT OF 100

HIGH TRUST

usezapay.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Consumer-facing Zapay page describing free vehicle plate lookups and integrated payment/parceling of vehicle debts (IPVA, licensing, fines) with multiple payment methods and contact/address information. The site claims PCI compliance and Detran accreditation and provides FAQs and app download links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is a consumer-facing Brazilian vehicle-services and payments website that appears designed to help vehicle owners consult outstanding obligations and arrange their settlement through an online service.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or conflicting-identity indicators. The homepage presents a coherent consumer-service proposition, includes contact and support pathways, and was assessed without page-level fraud red flags. The site therefore reads as an apparently legitimate established service, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage was classified as a service and payment portal, with no detected brand-impersonation or phishing indicators.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or malicious safe-browsing hit.
- The domain was registered on 2017-07-04 and is approximately 9.11 years old.

Regulatory Verification Notes

The website presents a commercial payment-intermediary model for vehicle-related obligations and states that it is integrated with Detran systems, has national coverage, and maintains PCI compliance. These are on-site claims rather than independently verified regulatory findings. The available material does not provide a license number or independently confirmed regulatory registration, so the service's precise authorization status remains a transparency matter for ordinary verification. No match was found in the reviewed broker-reputation dataset; that result is contextual and is not a licensing determination.

EVIDENCE

- The homepage describes free vehicle-plate queries and payment or installment arrangements for IPVA, licensing, fines, and active debt, using card, PIX, and boleto.
- The homepage claims integration with 27 Brazilian Detrans and advertises PCI compliance, FAQs, and Android and iOS applications.
- The site's transport encryption uses a valid DV certificate issued by YR1, valid through 2026-10-26.

What to Verify Next

Before credential or payment interaction, an independent check should confirm that the claimed Detran integrations and the named payment entity correspond to the relevant official records. The terms, privacy notice, service fees, installment conditions, cancellation and refund provisions should be reviewed before a transaction is authorized. Payment should be made only through the intended checkout flow, with transaction records retained and payment-protection options considered; official contact channels should also be confirmed through an independent route.

EVIDENCE

- The consultation entry links to the site's Terms of Use and Privacy Policy.
- The homepage provides login, consultation, checkout, support, order-tracking, and application-download pathways.
- The site presents a contact phone number and customer-support information for service-channel confirmation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary use. That conclusion concerns the website's observed trust posture and does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, and the observed address is an edge address rather than an identified origin candidate. This provides a mitigating layer against direct origin exposure but is not, by itself, proof of legitimacy. The hosting telemetry identifies Amazon infrastructure, while the external IP-report attribution is to shared provider infrastructure and is discounted because it does not establish site-specific abuse.

EVIDENCE

- Served from AS16509, identified as AMAZON-02 — Amazon.com, Inc., US.
- The observed edge IP is 76.76.21.21; no likely origin IP candidate was identified.
- The shared infrastructure attribution contains 47 IP-level reports, is whitelisted, and has a confidence score of 0.

Closing Assessment

The site is suitable for normal evaluation as an established consumer payment service, subject to the ordinary independent checks of operator identity, service terms, and payment protections before sensitive or financial actions.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 47 reports on hosting IP 76.76.21.21 (Vercel, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of usezapay.com.br.

- The request stayed on usezapay.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-13.net, across 3 name servers. NOTED
- The registration is paid up to 2032-07-04. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about usezapay.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
