Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a commercial landing page presenting USPS employment information, job-role descriptions, and paid exam-preparation assistance for applicants seeking positions with the United States Postal Service. Its apparent business model is to collect an upfront refundable deposit in exchange for study materials and live support.

Scam/Impersonation Risk

The site presents a material sensitive-interaction risk. The homepage requests an upfront refundable deposit of approximately \$69.99 before delivering preparation services, while offering limited verifiable credentials, success evidence, or a clearly defined product. It also combines claims of USPS affiliation with a non-affiliation disclaimer, creating claim-evidence dissonance rather than establishing an official relationship. External security intelligence recorded malicious detections and a confirmed blacklist, including reports from multiple major security providers. No conflicting legal-entity names or direct brand-impersonation finding was identified, but the

blacklist and page-level payment mechanics are sufficient to make payment or credential interaction inappropriate. Evidence:

- The homepage advertises USPS exam preparation and live assistance conditional on a refundable \$69.99 deposit.
- The homepage describes USPS employment benefits and claims to help applicants get hired, while also including a non-affiliation disclaimer.
- External reputation telemetry recorded 13 malicious detections from 18 effective evaluations, with Fortinet, Kaspersky, and Sophos among the flagged providers; the site was also identified on external blacklists.
- Domain registration records show creation on 2023-03-18 and an age of 3.43 years; archive records show 46 snapshots across 4 tracked years, first seen on 2023-03-18 and last seen on 2026-05-14.

Regulatory Verification Notes

The available page content does not establish a clearly identified legal operator, licensing position, or verifiable authorization to represent or support USPS recruitment. This is a disclosure and verification gap, not independently a finding of fraud; however, it is significant given the site's paid employment-preparation offering and the external threat detections. The site uses a valid domain-validated TLS certificate, but transport encryption confirms only encrypted delivery and does not validate the operator, affiliation, or commercial claims. Evidence:

- The homepage provides employment and service claims but no evidenced corporate registration, license number, or independently verifiable provider credentials.
- The domain is registered through GoDaddy.com, LLC.
- The site is hosted on AS398101, GoDaddy.com, LLC, United States.
- TLS is issued by GoDaddy TLS Intermediate CA DV - R1v1 at DV validation level and is valid to 2026-10-24.

What to Verify Next

Before any engagement, an independent USPS source should confirm whether the advertised preparation service is authorized, required, or affiliated with USPS. Any refund promise and payment arrangement should be validated through independently obtained merchant and payment-provider information, with confirmation that the service and refund terms are enforceable. Official contact channels should be confirmed through an offline or independently sourced route rather than relying solely on details presented on the landing page. Evidence:

- The homepage contains a checkout/contact form but no evidenced external link graph or independent organizational references.
- The stated service is directed at applicants for federal employment, making confirmation through official USPS recruitment channels a necessary identity and affiliation check.
- The site's advertised payment-before-service model makes confirmation of refund conditions and merchant identity directly relevant before transaction approval.

Summary Verdict

The website has a critical trust posture with confirmed external threat and blacklist contradictions. Its apparent commercial presentation does not overcome the convergence of malicious reputation signals, payment-before-service mechanics, weak affiliation substantiation, and unverified operator identity. Sensitive interactions should be treated as high risk.

Infrastructure Integrity

The site resolves to a single likely origin IP and has no detected CDN or WAF edge layer. The infrastructure is hosted directly with GoDaddy.com, LLC rather than behind a detected CDN, so there is no identified edge-layer mitigation to offset the adverse reputation findings.

Closing Assessment

The appropriate institutional action is to block payment, credential submission, and other sensitive interactions, preserve any related communications or transaction records, and pursue the employment opportunity only through independently verified official channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uspostofficecareer.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
