

Is uts.edu.au legit? TrustSniffer's high-trust assessment: 90/100

uts.edu.au

Verdict

90

OUT OF 100

HIGH TRUST

uts.edu.au appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Official university landing/content page for the University of Technology Sydney (UTS) providing navigation to courses, admissions, research, news and events, with contact details and legal notices.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the public-facing online presence of the University of Technology Sydney (UTS), presenting information about courses, admissions, research, industry partnerships, news, events, student services, and institutional contacts. Its apparent purpose is to support education-related information, applications, academic engagement, and institutional communications rather than to offer high-risk financial products or direct investment services.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or other direct contradiction was observed. The homepage's institutional content is coherent with a university website, including course discovery, admissions pathways, research, student support, and campus-related information; it contains no login form, sensitive form, wallet functionality, or high-risk financial offer. A weak automated brand-similarity indication was not corroborated by the page content or behavioral findings and is therefore not treated as an identity contradiction. The site should be regarded as apparently legitimate and established, while independent operator identity remains unverified.

EVIDENCE

- Homepage: Identifies UTS and provides navigation for courses, admissions, research, students, staff, alumni, news, and events.
- Homepage behavior: No hidden forms, password-external forms, wallet connections, clipboard hijacking, cloaking, or suspicious inline scripts were detected.
- Domain history: Registered 1997; approximately 28.81 years old.
- Web archive: 5,000 snapshots spanning 1997–2023, covering 27 years with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The site presents an educational and institutional business model involving courses, admissions, research partnerships, tuition, government funding, grants, and industry collaboration. Its legal notices and contact details support an institutional presentation, but the available evidence does not independently verify the real-world operator identity. No financial-services license or registration number is presented in the reviewed material; given the site's stated educational purpose and absence of direct high-risk financial services, this is a regulatory-disclosure point for confirmation rather than evidence of scam activity. The domain registration identifies

Education Services Australia Limited as registrar and the University of Technology Sydney as owner. No adverse broker-related match was identified.

EVIDENCE

- Domain registration: Registrar is Education Services Australia Limited; registrant/owner is listed as UNIVERSITY OF TECHNOLOGY SYDNEY.
- Hosting and transport telemetry: Served from AS13335, Cloudflare, Inc.; TLS certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1, with OV validation, subject organization University of Technology Sydney, valid to 2026-09-30.
- Homepage: Provides institutional contact details and legal notices alongside education, admissions, research, and event content.
- Page content: No red flags were identified, and the business model was classified as public university education with a low-risk profile.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the relevant admissions, student-service, or payment workflow is reached through the institution's established offline contact channels. For any activity that introduces a separate regulated service or third-party payment provider, the applicable organization, return or cancellation terms, and payment-protection arrangements should be checked directly with the named provider or relevant registry. The reviewed legal and contact pages should also be compared with independently sourced institutional contact information.

EVIDENCE

- Admissions and course pages: Provide the specific workflow that should be matched against independently confirmed institutional instructions.
- Contact and legal pages: Supply the institutional details to be cross-checked through an independent channel.
- Payment-related interactions, if encountered: Require confirmation of the responsible entity and applicable consumer-protection terms before completion.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate university website and supports a high-trust, low-risk posture. No scam or impersonation contradictions were observed, although the real-world operator identity is not independently verified by this assessment.

Infrastructure Integrity

The website benefits from CDN/WAF protection provided by Amazon, with observed delivery infrastructure on AS16509 and one observed CDN edge address; the origin server was not observable in the analysis. This protective architecture limits direct origin exposure and is a mitigating infrastructure signal, but it does not independently establish institutional legitimacy.

Closing Assessment

Routine informational use is proportionate to the evidence; credential submission or payment should follow ordinary independent checks of institutional identity, applicable terms, and payment protection.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of uts.edu.au.

- The request stayed on uts.edu.au. It was not redirected to another domain. CLEAR
- Registration is published under Education Services Australia Limited. CLEAR
- DNS for this domain is served by akam.net, across 6 name servers. NOTED
- The earliest public archive of this site is from 1997-10-21. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uts.edu.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
