

# Is uyap.gov.tr legit? TrustSniffer's high-trust assessment: 100/100

uyap.gov.tr

## Verdict

100

OUT OF 100

HIGH TRUST

uyap.gov.tr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official UYAP (National Judiciary Informatics System) site page providing informational content, accessibility tools, history, awards, and links to multiple portals (citizen, lawyer, institutional). No signs of financial solicitation or credential harvesting.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

---

No screenshot is retained for this report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

UYAP is a Turkish government public-service portal for the National Judiciary Informatics System, presenting information about judiciary digital services, accessibility functions, system history, awards, publications, and links to citizen, lawyer, institutional, and related service portals.

### Scam/Impersonation Risk

No blacklist, phishing, malicious-content, credential-harvesting, or conflicting-identity signals were observed. The site's content, navigation, and service scope are consistent with a public-sector judiciary information portal rather than a commercial solicitation or impersonation operation. One abuse report is associated with the hosting IP, but the record attributes it to shared provider infrastructure, assigns zero confidence, and discounts it on that basis; it does not establish malicious activity by this website.

#### EVIDENCE

- The homepage is categorized as a government/public-service page and contains no financial solicitation, cryptocurrency activity, sensitive form, hidden form, or external password-submission destination.
- The homepage links to dedicated citizen, lawyer, and institutional portals and presents UYAP services, awards, publications, and contact information.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing match.
- The domain was registered on 2006-10-04 and is 19.87 years old.

### Regulatory Verification Notes

The available evidence is consistent with an established government service, and the homepage provides institutional history, service descriptions, accessibility resources, and official-looking portal navigation. Real-world operator identity remains independently unverified, so the on-page presentation should be treated as apparent institutional identity rather than conclusive proof of the operating entity. No commercial licensing claim or license number is presented; for this non-commercial public-service model, that is a disclosure and verification consideration rather than evidence of a scam. A separate broker-reputation dataset produced no match.

#### EVIDENCE

- The homepage identifies the service as “UYAP Bilişim Sistemi” and describes judiciary-system functions, milestones, awards, publications, and contact information.
- The site’s transport certificate is issued by GlobalSign RSA OV SSL CA 2018, uses OV validation, identifies “T.C. Adalet Bakanlığı” as the subject organization, and is valid through 2026-10-28.
- The site is hosted on AS9121, TTNNet - Turk Telekomunikasyon Anonim Sirketi, TR.
- The site uses the sovereign `gov.tr` domain space and resolves as a government-category service.

#### What to Verify Next

Before credential-bearing use, an institution should independently confirm the intended UYAP address through an official Turkish government directory or an offline Ministry of Justice contact route, then follow only the portal links reached through that confirmed route. Standard browser certificate checks and normal account-security controls remain appropriate; payment-protection checks are relevant only if a linked service introduces a payment transaction.

#### EVIDENCE

- The homepage provides separate navigation paths for citizen, lawyer, and institutional services, allowing the intended service portal to be matched against an independently confirmed government route.
- The homepage presents contact information and institutional service descriptions that can be used for out-of-band confirmation.
- Behavioral testing found no hidden forms, external password forms, wallet-drainer activity, clipboard manipulation, or cloaking.

#### Summary Verdict

The website has a **high-trust, low-risk posture** and is apparently legitimate based on strong convergence between its public-service content, sovereign government-domain context, long-established registration, clean external reputation, and validated transport security. The classification supports ordinary use, while the operating identity remains not independently verified and should not be described as conclusively proven.

#### Infrastructure Integrity

The site resolves directly to infrastructure hosted by TTNNet rather than behind a detected commercial CDN or WAF, with a single identified origin address. This provides a clear hosting path but fewer edge-layer protections than a CDN-fronted deployment; the valid OV certificate and stable hosting resolution remain mitigating technical signals.

#### Closing Assessment

Ordinary use is proportionate to the assessed posture, with independent confirmation of the official service route retained as a sensible control before credential submission or any consequential account action.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 212.175.130.123 (Adalet Bakanligi Bilgi Islem Dairesi Baskanligi, Fixed Line ISP), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 55/100     |
| Identity verification confidence | 60%        |

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of uyap.gov.tr.

- The request stayed on uyap.gov.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by gov.tr. NOTED
- The registration is paid up to 2026-10-03. NOTED
- It is hosted on TTNet, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uyap.gov.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
