

Is vanityfair.fr legit? TrustSniffer's high-trust assessment: 90/100

vanityfair.fr

Verdict

90

OUT OF 100

HIGH TRUST

vanityfair.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Privacy / cookie information page for Vanity Fair France describing purposes, vendors (IAB TCF), targeted advertising and audience measurement; lists many third-party providers.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Vanity Fair France is a digital magazine and publication website presenting editorial content to visitors while operating an advertising-supported business model that uses third-party advertising, consent management, and audience-measurement services.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or other contradictory signals were observed. The reviewed privacy page is consistent with a professional media publisher: it explains cookie consent, targeted advertising, audience measurement, data-processing purposes, and participating vendors, without presenting suspicious payment, credential-harvesting, cryptocurrency, or high-pressure transaction features. The site's established registration continuity and substantial historical presence further support an apparently legitimate provenance, although they do not independently verify the real-world operator's identity.

EVIDENCE

- The privacy/cookie page describes consent choices, advertising purposes, audience measurement, and an IAB transparency-and-consent framework; no red flags were recorded on that page.
- The domain was registered in 2008 and is approximately 17.72 years old.
- The web archive records 5,000 snapshots spanning 2013–2022, with 10 years tracked.

Regulatory Verification Notes

The available content supports the characterization of the website as an established publication rather than a financial or otherwise regulated service. Its privacy page provides substantive information about data use and third-party advertising partners, but the supplied material does not independently establish the legal operator or a regulatory registration. This is an identity and disclosure point for ordinary due diligence, not evidence of scam activity. The use of advertising and audience-measurement providers also means that privacy choices and consent preferences are relevant to normal site use.

EVIDENCE

- The privacy/cookie page identifies purposes including essential functions, advertising, data sharing with partners, and audience measurement.
- The site is served through AS14618, operated by AMAZON-AES / Amazon.com, Inc., United States.
- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid through 2026-11-08.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the publisher's legal operator, review the site's applicable privacy and commercial terms, and confirm any return, subscription, or payment-protection arrangements through an independent source. Routine browsing and consent management can proceed in line with the site's stated privacy controls; any future account or commercial function should be assessed against the specific service being used.

EVIDENCE

- The reviewed page contains no login form, sensitive form, hidden form, wallet connection, or untrusted form destination.
- The privacy page states that consent selections are recorded in a cookie named "fides_consent" for up to 12 months.
- Behavioral testing recorded two successful runs with no external posts, no external XHR activity, no clipboard writes, no password forms, and no cloaking.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its observed publication function. The operator's real-world identity remains independently unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed addresses associated with Amazon's edge network and no origin candidate identified in this analysis. This is a mitigating control that reduces direct exposure of the underlying service, but it is not, by itself, proof of legitimacy.

EVIDENCE

- Observed edge infrastructure comprises 3 IP addresses, all associated with AS14618; likely origin IP count was 0.
- Hosting provider: AMAZON-AES - Amazon.com, Inc., US; registry: ARIN; country: US.
- Transport encryption: Amazon RSA 2048 M01, DV validation, valid to 2026-11-08T23:59:59+00:00.

Closing Assessment

Normal browsing is proportionate to the observed risk posture; before entering credentials or making payments, ordinary independent checks of the merchant or publisher identity, applicable terms, and payment protections

should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vanityfair.fr.

- The request stayed on vanityfair.fr. It was not redirected to another domain. CLEAR
- Registration is published under CSC CORPORATE DOMAINS INC.. CLEAR
- DNS for this domain is served by awsdns-11.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-13. NOTED
- The earliest public archive of this site is from 2013-06-09. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vanityfair.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
