

Is vast-integration.com a scam? TrustSniffer's high-risk assessment: 0/100

vast-integration.com

Verdict

0

OUT OF 100

CRITICAL RISK

vast-integration.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Coming Soon' landing page for vast-integration.com with no forms, links, or monetization present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://vast-integration.com/>

What vast-integration.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Google, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

vast-integration.com is a minimal “Coming Soon” landing page that presents only an under-construction notice and the domain name, with no visible product, service, transaction mechanism, or user-interaction feature; its apparent purpose is to reserve or announce a future business presence rather than operate an active service.

Scam/Impersonation Risk

The site carries a **critical interaction risk** because multiple external security and reputation sources identify the domain as malicious or blacklisted. This is a confirmed contradiction requiring a security-forward posture, even though the visible page contains no login form, payment flow, solicitation, or explicit brand-impersonation content. Runtime inspection also identified suspicious external network activity, including non-whitelisted requests and posts, although no cloaking, hidden forms, wallet-drainer behavior, clipboard hijacking, or credential-collection mechanism was observed. Nine abuse reports were attributed to shared Squarespace infrastructure rather than uniquely to the site, so that signal is not by itself proof of site-specific abuse; it nevertheless does not offset the independent blacklist detections. The domain's long registration history and

generic historical continuity are limited provenance positives, not evidence that the current operator is safe or independently verified.

EVIDENCE

- External reputation assessment recorded 17 malicious detections from 22 evaluated detections, with a malicious Safe Browsing result and a confirmed blacklist across multiple sources.
- The domain was registered on 2015-01-14 and is approximately 11.6 years old.
- Historical records are dated from 2015-02-14 through 2025-07-14, covering 11 years of recorded history.
- The landing page contains no login form, hidden sensitive form, wallet connection, or payment mechanism; behavioral inspection recorded 16 external XHR requests, 10 external posts, 4 non-whitelisted XHR requests, and 4 non-whitelisted posts.

Regulatory Verification Notes

The site does not present an operating business model, legal entity, licensing statement, registration number, or regulated-service claim. This is a material verification gap for any prospective engagement, although the absence of a visible license claim is not itself proof of fraud. The independently assessed identity remains unverified, and the sparse “Coming Soon” content provides no basis for connecting the domain to a specific real-world organization. The registrar is Squarespace Domains LLC, which is an administrative registration fact rather than evidence of site legitimacy. The transport layer uses a valid domain-validated certificate, but DV encryption confirms connection security only and does not validate the operator, business, or purpose.

EVIDENCE

- The homepage is titled “Coming Soon” and contains approximately 96 characters of visible text, with no legal, licensing, or corporate disclosure.
- Registration is recorded through Squarespace Domains LLC, with creation date 2015-01-14T21:28:58Z and expiration date 2029-01-14T21:28:58Z.
- TLS is issued by YR1 at DV validation level and is valid to 2026-10-08T00:25:10+00:00.
- No broker or regulated-entity match was identified in the available third-party contextual dataset.

What to Verify Next

Before any change from passive viewing to account creation, credential submission, payment, download, or other sensitive interaction, the site’s operating entity should be confirmed through an independently obtained corporate or regulatory source. Any future licensing claim should be checked directly with the relevant jurisdictional register, using contact details obtained outside the site. The intended purpose of the domain and the authenticity of any future service announcement should also be confirmed through an independent, offline or previously trusted channel.

EVIDENCE

- The current homepage provides no independent identity, service, or transaction details against which an engagement decision can be validated.
- No license authority or license number is stated in the available business-model assessment.
- The current page has no internal or external links, forms, or published support route for corroborating the operator's identity.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The available technical and historical indicators do not overcome the confirmed external malicious and blacklist findings, while the site's identity and operating purpose remain unverified. Passive observation is the only proportionate use supported by the evidence.

Infrastructure Integrity

The site is hosted by Squarespace, Inc. in the United States, with four resolved IP addresses identified as likely origin addresses and no CDN detected in the infrastructure assessment. Squarespace is a mainstream hosting provider and therefore offers some infrastructure-level mitigation, but hosting on a reputable platform does not establish the legitimacy of the site or neutralize the external reputation findings.

EVIDENCE

- Hosted on AS53831, identified as SQUARESPACE — Squarespace, Inc., US.
- Infrastructure resolution returned 4 unique IP addresses, with 0 edge IP addresses and 4 likely origin IP addresses.
- The site's transport encryption uses a DV TLS certificate issued by YR1, valid to 2026-10-08T00:25:10+00:00.

Closing Assessment

The domain should remain limited to passive observation, with no credentials, financial information, downloads, or other sensitive interaction until its operator, purpose, and any future service claims have been independently authenticated.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 9 reports on hosting IP 198.49.23.144 (Squarespace, Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vast-integration.com.

- The request stayed on vast-integration.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Squarespace Domains LLC. [CLEAR](#)
- DNS for this domain is served by squarespacedns.com, across 4 name servers. [NOTED](#)

- The registration is paid up to 2029-01-14. CLEAR
- The earliest public archive of this site is from 2015-02-14. CLEAR
- It is hosted on SQUARESPACE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vast-integration.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
