

Is vbitfxbroker.com a scam? TrustSniffer's high-risk assessment: 0/100

vbitfxbroker.com

Verdict

0

OUT OF 100

CRITICAL RISK

vbitfxbroker.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-10-02 by automated analysis. Classification confidence 65%.

What this site appears to be

A short bot-verification interstitial page stating 'Bot Verification — Verifying that you are not a robot...'. No forms, no monetization, and no identifiable service content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

What vbitfxbroker.com served when TrustSniffer captured it on 2026-10-02. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents only a “Bot Verification” interstitial stating that it is verifying whether the visitor is a robot. No identifiable service, operator, product, monetization model, or customer-facing business purpose is visible in the captured page.

Scam/Impersonation Risk

The site presents a critical interaction risk because independent threat intelligence records a confirmed blacklist status and multiple malicious detections. This is materially different from an ordinary access-control page: the available content is too limited to establish a legitimate operating purpose, while the external detections provide a decisive negative signal. Four abuse reports also concern the hosting IP, although those reports are attributed to shared provider infrastructure rather than conclusively to this specific operator. No separate brand-impersonation or conflicting-identity finding is present in the supplied evidence.

EVIDENCE

- The homepage displays only “Bot Verification — Verifying that you are not a robot...” and contains no identifiable service or operator information.
- External reputation checks recorded 10 malicious detections and a confirmed blacklist status for the site.
- The hosting IP, 198.251.84.141, has 4 abuse reports attributed to shared FranTech Solutions infrastructure.

Regulatory Verification Notes

The real-world operator remains unverified. The captured page contains no legal identity, licensing claim, registration number, regulatory authority, terms, or business disclosure from which a financial-services authorization could be assessed. The domain is also very recently registered, which provides limited operating history for an entity presenting through a financial-services-oriented domain name. A valid domain-validated certificate confirms encrypted transport only; it does not establish operator identity, licensing, or regulatory standing.

EVIDENCE

- Domain registration: 2026-05-03; approximately 0.41 years old; registrar: Realtime Register B.V.
- The captured homepage contains no visible legal, licensing, or regulatory disclosure.
- TLS certificate: issuer YR2, validation level DV, valid to 2026-12-01.

What to Verify Next

No login, credential submission, payment, account funding, document upload, or other financial interaction should occur unless the operator is independently identified and its authorization is confirmed through the relevant regulator’s official registry. Any claimed company, license, address, or support channel should be validated through an independently obtained source rather than through the site itself. If access is required for investigation, it should remain limited to passive observation from an isolated environment, with no downloads or executable content accepted.

EVIDENCE

- The homepage capture provides no business identity against which a regulator or corporate registry check can be performed.
- No login form, sensitive-data form, or identifiable service workflow was visible during the captured session.
- The browser session exhibited a bot-protection interstitial rather than a verifiable customer or trading-service interface.

Summary Verdict

The website has a critical trust posture and should be treated as unsuitable for sensitive interaction. The combination of confirmed external threat detections, an unverified operator, and an absence of substantive service or legal content prevents a defensible legitimacy determination.

Infrastructure Integrity

The site resolves directly to infrastructure operated by PONYNET - FranTech Solutions in the United States, on AS53667, with no CDN or WAF edge layer identified. This provides a concrete hosting path but offers no protective infrastructure-based mitigation against the external reputation findings.

EVIDENCE

- Hosting: AS53667, PONYNET - FranTech Solutions, United States.
- Resolution identified 1 IP address and 1 likely origin address; no CDN was detected.

Closing Assessment

The appropriate enterprise disposition is to suspend sensitive interaction and escalate the domain for security review before any operational, financial, or account-related engagement.

Written analysis generated 2026-10-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

4 findings contributed to this verdict, raised by external reputation, page content, behaviour in a sandbox, hosting and network.

01 External reputation

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

02 Page content

- The page shows few of the signs expected from a trustworthy operator.
Page content rule:PAGE_TRUST_QUALITY_LOW
- The page has very little readable content.
Page content rule:PAGE_CONTENT_THIN
- The browser raised a warning while loading the page.
Page content rule:PAGE_BROWSER_FLAGS_SUSPICIOUS

03 Behaviour in a sandbox

- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

04 Hosting and network

- The domain was registered between three and six months ago.
Hosting and network rule:DNS_YOUNG_6M

Signals weighed against the site

- AbuseIPDB: 4 reports on hosting IP 198.251.84.141 (FranTech Solutions, Content Delivery Network), 21% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vbitfxbroker.com.

- The request stayed on vbitfxbroker.com. It was not redirected to another domain. CLEAR
- Registration is published under Realtime Register B.V.. CLEAR
- DNS for this domain is served by my-control-panel.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-03. NOTED
- It is hosted on PONYNET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vbitfxbroker.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
