Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Vega Fintech is a Vietnamese B2B fintech technology website presenting enterprise e-KYC, chip-based identity verification, credit insight, customer-acquisition analytics, and AI voice solutions for organizations.

Scam/Impersonation Risk

No contradictions were observed. The website presents a coherent corporate identity and business purpose, with no detected phishing, impersonation, credential-harvesting, malicious-form, or deceptive investment-promise indicators. External reputation checks were clean, and the domain appears in the global top-million traffic set, supporting an established and legitimate online presence.

- The homepage identifies Vega Fintech as a corporate fintech provider and presents company information, news, recruitment, and contact content.
- The homepage contains no login form, hidden sensitive form, wallet connection, or external password-submission mechanism.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site describes enterprise technology services rather than soliciting deposits or promising investment returns. Its stated offerings include e-KYC, Verify Chip identity validation, Credit Insight, Smart Customer Acquisition, and Voice AI services. The available company and contact presentation supports a genuine operating identity, although the site does not state a regulatory license or registration number; this is a transparency item for entity-specific verification, not evidence of misconduct. A third-party broker dataset produced no match.

- The homepage provides a corporate description, product navigation, company-information content, and contact details.
- The homepage describes a B2B software and data-services model and does not solicit investment deposits or returns.
- The domain is hosted on AS63766, identified as VEGAGAME-AS-VN / VEGAGAME-VN, VN.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-10-29.

What to Verify Next

For a regulated procurement or partnership decision, the prospective counterparty should independently confirm the company's legal registration and any sector-specific authorization applicable to the services being purchased, using the relevant Vietnamese registry or official corporate documentation. Contracting parties

should also validate the published contact channels through an independently obtained corporate record before executing material agreements.

- The site includes company-information and contact sections suitable for initiating entity verification.
- The product descriptions identify services involving identity verification, credit insight, customer data, and AI voice technology.
- The available analysis found no contradictory identity or impersonation signal requiring heightened escalation.

Summary Verdict

The website has a legitimate, established, and trustworthy posture. Its coherent corporate presentation, benign technical behavior, clean external reputation, and absence of contradictory signals support normal business interaction.

Infrastructure Integrity

The supplied technical evidence confirms stable hosting on an identified commercial network and valid transport encryption. No separate CDN, WAF, or origin-exposure conclusion is established by the available infrastructure facts.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; regulated counterparties should complete their usual entity and authorization checks before formal engagement.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vegafintech.vn.

- The request stayed on vegafintech.vn. It was not redirected to another domain. CLEAR
- It is hosted on VEGAGAME-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vegafintech.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
