

Is velazquezinc.com a scam? TrustSniffer's high-risk assessment: 5/100

velazquezinc.com

Verdict

5

OUT OF 100

CRITICAL RISK

velazquezinc.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Placeholder/under-construction landing page indicating hosting by AT&T Website Solutions and directing visitors to webhosting.att.com for services.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	None flagged it VirusTotal	CLEAR
Google Safe Browsing	Listed as unsafe Google	RISK
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	2.8 years old Registered history	CLEAR
Web archive	Archived since 2024 Public history exists	CLEAR
Certificate	Encrypted connection Issued by Sectigo Public Server Authentication CA DV R36	NOTED

The page as captured

<https://velazquezinc.com/>

What velazquezinc.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

velazquezinc.com presents an AT&T Website Solutions under-construction landing page rather than an operational business website. It states that the domain is unavailable or still being developed, identifies AT&T Website Solutions as the hosting provider, and promotes website plans, online fax, and email-marketing services while directing visitors to AT&T's web-hosting service.

Scam/Impersonation Risk

The site does not present a login form, payment workflow, wallet connection, or other sensitive interaction surface, and its own disclaimer expressly states that AT&T does not own the domain; therefore, the page content alone does not establish brand impersonation. However, the domain is subject to confirmed blacklist detections, including a Google Safe Browsing malicious match associated with social-engineering activity. This external contradiction outweighs the otherwise benign placeholder content and supports a critical risk posture for any sensitive interaction. No separate identity contradiction was observed across legal or identity pages.

EVIDENCE

- The homepage is an under-construction page stating that AT&T does not own the domain and that the site is unavailable.
- External threat intelligence records the domain as malicious in Google Safe Browsing and as present on an external blacklist.
- Domain registration telemetry records creation on 2023-11-07, with an age of 2.79 years.
- Historical telemetry records 37 archive snapshots spanning 2008–2026, with three years tracked.

Regulatory Verification Notes

The available content is a hosting placeholder, not a regulated-service proposition, and it makes no licensing or registration claim. The AT&T attribution is limited to hosting and service promotion; it is not evidence that AT&T operates or endorses the domain. The operator's real-world identity remains unverified, so the page should not be treated as proof of corporate affiliation. The separate broker-reputation dataset returned no match, which provides no adverse broker-specific signal but does not offset the confirmed blacklist detections.

EVIDENCE

- The homepage identifies AT&T Website Solutions as the hosting service and includes a disclaimer separating AT&T from ownership of the domain.
- The homepage contains no license number, regulatory registration, corporate identity disclosure, or regulated-service terms.
- The site is hosted by INFB2-AS—Internet Names For Business Inc., Canada, on AS30447.
- The transport certificate is DV, issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-09-19.

What to Verify Next

Before any credential, payment, or account-related interaction, an institution should confirm through an independently sourced AT&T channel that the domain is authorized to reference AT&T services. Any claimed operator or business relationship should be checked against authoritative corporate records, and the domain should remain excluded from trusted application allowlists unless the blacklist status is independently resolved and documented. The official support and contact channels should be confirmed through an offline or independently obtained route rather than relying solely on the page.

EVIDENCE

- The homepage has no forms and no sensitive-input fields.
- The page contains one external destination for AT&T web-hosting services.
- The site is categorized as under-construction or parking content rather than as an operational corporate service portal.

Summary Verdict

The website has a **critical trust posture** because confirmed external threat detections create a material contradiction to the otherwise limited, informational page content. Its apparent relationship to AT&T is not

independently verified, and the evidence does not support normal sensitive interaction.

Infrastructure Integrity

The domain resolves directly to a single hosting address on AS30447 operated by INFB2-AS—Internet Names For Business Inc.; no CDN or WAF was identified. TLS is present through a Sectigo DV certificate, which protects transport confidentiality but does not establish operator legitimacy or offset the adverse reputation signal.

EVIDENCE

- Resolved hosting address: 216.55.149.9 in Canada, on AS30447.
- Hosting provider: INFB2-AS—Internet Names For Business Inc., CA.
- TLS validation level: DV; issuer: Sectigo Public Server Authentication CA DV R36; valid to 2026-09-19.

Closing Assessment

Interaction should be limited to passive viewing while the domain's authorization, operator identity, and external threat detections remain unresolved; credentials, financial information, and account use should not be submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of velazquezinc.com.

- The request stayed on velazquezinc.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by digitalspaceportal.net, across 2 name servers. NOTED
- The registration is paid up to 2026-11-07. NOTED
- The earliest public archive of this site is from 2024-09-24. CLEAR
- It is hosted on INFB2-AS, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about velazquezinc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
