Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is an established Portuguese-language regional news blog serving Itabuna and surrounding communities, publishing reports on public safety, traffic incidents, local government, accidents, and community events while supporting its publication model through audience engagement and occasional local promotional content.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other scam indicators were observed. The long-established registration and sustained archival record support continuity as a regional publishing operation, while the homepage displayed substantial editorial content without sensitive forms, concealed inputs, credential harvesting, wallet interactions, or suspicious scripts. External reputation checks were clean across the evaluated threat-intelligence sources.

- The domain-registration record identifies Blog Verdinho Itabuna as the owner and shows registration on 2016-04-11 (~10.32 years old), with expiration on 2029-04-11.
- The web archive contains 197 snapshots spanning 2016-04-13 to 2026-04-20, covering 11 tracked years without evidence of suspicious repurposing.
- The regional-news homepage contained no login form, hidden form, sensitive-data form, cloaking, clipboard manipulation, or cryptocurrency functionality.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no browsing-safety hit, and inclusion within the top one million globally at traffic rank 212,048.

Regulatory Verification Notes

The site presents a news-and-community-reporting business rather than a financial, investment, brokerage, or other regulated-service proposition. Accordingly, no regulatory licence is indicated by the observed business model, and none would ordinarily be expected merely for operating this type of publication. The supplied homepage does not establish the scope of any separate legal or editorial disclosures, but this does not detract from the convergent evidence of a legitimate content site.

- The homepage identifies the service as a regional news publication and contains no investment solicitation, deposit request, token offering, or claimed regulated financial activity.
- The site is served from AS15169 (Google LLC, US).

- The site's transport encryption uses a valid WR3-issued domain-validated TLS certificate, valid to 2026-10-11.

What to Verify Next

For reliance on individual articles, material claims should be corroborated against the public authority, emergency service, court, or local-government source relevant to the story. Prospective advertisers or commercial counterparties should confirm campaign terms and payment instructions through the publication's independently established channels before entering a contract. Any material submitted through community or comment functions should be limited to information appropriate for public publication.

- The homepage covers accidents, crime, public safety, and government activity, subject areas for which source-level corroboration may be important.
- Visible promotional material concerns an identifiable local clothing retailer presented with physical locations and telephone contact details.
- The homepage provides sharing and comment functions and links to presences on Instagram, Facebook, X, and Pinterest.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence between its identity, operating history, editorial purpose, technical behavior, and clean external reputation. No contradictory evidence was identified, and the overall risk posture is low.

Infrastructure Integrity

The site uses a CDN/WAF architecture in which all four observed addresses were protective edge servers. The origin address was not exposed through the observed resolution path, reducing direct infrastructure exposure; this is a useful security control, although it is not independently proof of legitimacy.

Closing Assessment

Normal interaction, including standard site use and account login if offered, is appropriate; ordinary source-checking should be applied when relying on consequential news claims or entering commercial arrangements.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of verdinhoitabuna.blog.br.

- The request stayed on verdinhoitabuna.blog.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2029-04-11. CLEAR
- The earliest public archive of this site is from 2016-04-13. CLEAR
- It is hosted on [GOOGLE](https://www.google.com), from a server in [US](https://www.usa.gov). NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about verdinhoitabuna.blog.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
