

Is vertexaxion.com a scam? TrustSniffer's high-risk assessment: 0/100

vertexaxion.com

Verdict

0

OUT OF 100

CRITICAL RISK

vertexaxion.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-10-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Landing page for 'Vertex Axion', presenting itself as a regulated CFD broker offering trading across multiple asset classes and several fixed-per-trade investment plans. The site solicits deposits and claims specific returns, but on-page verification for those claims and regulatory credentials are not verifiable from the provided content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

<https://vertexaxion.com/>

What vertexaxion.com served when TrustSniffer captured it on 2026-10-02. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Vertex Axion is an online CFD and brokerage platform presenting access to forex, cryptocurrencies, shares, indices, ETFs, commodities, copy trading, automated trading, and investment-style plans. Its apparent business model is to attract funded trading accounts and deposits while promoting market access, managed features, and fixed-return opportunities.

### Scam/Impersonation Risk

The site presents several material contradiction signals. External reputation checks recorded multiple malicious and suspicious detections and a confirmed blacklist status, which is decisive for the site's sensitive-interaction risk. No conflicting legal-entity names or direct brand-impersonation finding were observed, but the homepage's business model independently creates substantial exposure: it solicits deposits before service delivery, promotes guaranteed or aggressive fixed returns, retains custodial control over funds, and does not substantiate the basis for those claims. The site also exposes login, registration, and deposit/payment-initiation forms,

including a sensitive form associated with an untrusted destination. These signals support a clearly cautionary assessment, and the site should not be used for credentials or financial activity.

#### EVIDENCE

- The homepage describes CFD, forex, cryptocurrency, shares, indices, ETFs, copy trading, automated trading, and fixed-return investment plans while inviting account creation and deposits.
- The homepage contains login, signup, and deposit/payment-initiation forms; the form analysis identifies a sensitive form and an untrusted destination.
- Domain registration telemetry records creation on 2026-05-16, with an age of 0.38 years.
- Archive telemetry records 1 snapshot spanning 1 year, from 2026-08-02 to 2026-08-02.

### Regulatory Verification Notes

The site labels itself “Regulated • Secure • Professional” and provides an “About Us” and “Legal & Regulation” navigation path, but the supplied page content does not establish a regulator, authorization number, or independently verifiable licensing basis. This is a significant regulatory-transparency gap for a platform soliciting deposits and presenting investment-style returns. The available third-party broker context contains no matched record; that absence does not validate the operator or its regulatory status. Transport security is present, but a domain-validated certificate confirms encrypted transmission only and does not authenticate the business or authorize financial services.

#### EVIDENCE

- The homepage and legal-navigation content make a regulated-broker presentation but provide no verifiable regulator or license number in the supplied material.
- The site is served on AS329184, Host Africa (Pty) Ltd - Host Africa (Pty) Ltd, ZA.
- The site's TLS certificate is issued by YE1, uses DV validation, and is valid to 2026-11-16T20:23:36+00:00.

### What to Verify Next

Any prospective engagement should first be suspended pending confirmation of the named operator and authorization directly through the relevant financial-services regulator's official register. Independently confirm the legal beneficiary of any payment destination, the availability of enforceable withdrawal and dispute mechanisms, and the authenticity of support channels using contact details obtained outside the site. If credentials or payment information have already been submitted, account and payment-provider monitoring should be initiated through established channels.

#### EVIDENCE

- The site's “Legal & Regulation,” “About Us,” and “Contact” pages are the relevant locations for matching the operator and claimed authorization against an official register.
- The site presents account, funding, and payment functionality, making independent confirmation of the receiving entity and recovery protections necessary before any transaction.
- The site links to social profiles, but those profiles do not independently establish licensing or control of the financial operation.

## Summary Verdict

The website has a **critical trust posture** with confirmed external reputation contradictions and a business model that combines deposit solicitation with unsupported return claims. Its apparent identity may connect to a real online presence, but that does not overcome the evidence affecting sensitive interactions. Login, credential submission, and financial use are not appropriate.

## Infrastructure Integrity

The site resolves directly to a likely origin rather than through a detected CDN or WAF edge, so the hosting layer provides limited protective separation. This infrastructure characteristic is a mitigating technical observation only and does not offset the confirmed reputation and page-level risks.

## Closing Assessment

The appropriate course is to avoid interactive use and financial engagement until independent regulatory, operator, payment-beneficiary, and contact-channel checks have been completed.

Written analysis generated 2026-10-02 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

4 findings contributed to this verdict, raised by external reputation, page content, hosting and network, several checks together.

### 01 External reputation

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT\_BLACKLIST\_CRITICAL

### 02 Page content

- A form on the page submits to a destination TrustSniffer could not verify.

Page content rule:PAGE\_FORM\_UNTRUSTED\_DEST

- The review of the page content rated it high risk.

Page content rule:PAGE\_RISK\_HIGH

- The page shows few of the signs expected from a trustworthy operator.

Page content rule:PAGE\_TRUST\_QUALITY\_LOW

### 03 Hosting and network

- The domain was registered less than three months ago.

Hosting and network rule:DNS\_NEW\_DOMAIN\_90D

### 04 Several checks together

- Several independent checks pointed to risk at the same time.

Several checks together rule:HYB\_MULTIPLE\_MODULES\_HIGH\_RISK

## Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 76%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of vertexaxion.com.

- The request stayed on vertexaxion.com. It was not redirected to another domain. CLEAR
- Registration is published under TuringSign Inc. d/b/a Cosmotown. CLEAR
- DNS for this domain is served by go54.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-16. NOTED
- The earliest public archive of this site is from 2026-08-02. CLEAR
- It is hosted on Host Africa (Pty) Ltd, from a server in ZA. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about vertexaxion.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
