

Is vietinbank.vn legit? TrustSniffer's high-trust assessment: 95/100

vietinbank.vn

Verdict

95

OUT OF 100

HIGH TRUST

vietinbank.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A human verification / CAPTCHA interstitial instructing the visitor to disable Google Translate and enable JavaScript to continue. No forms or commercial content present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website at vietinbank.vn appears intended to represent Vietnam Joint Stock Commercial Bank of Industry and Trade and serve as a banking portal; however, the observed homepage currently presents only a human-verification interstitial requiring JavaScript and a CAPTCHA before the underlying content can be accessed.

Scam/Impersonation Risk

No blacklist, phishing, malware, impersonation, or conflicting-identity contradictions were observed. The captured page is a conventional bot-check screen that asks visitors to disable Google Translate, enable JavaScript, and complete a human-verification puzzle; although this creates a minor access-friction consideration, the page contains no login form, sensitive form, hidden form, wallet connection, clipboard activity, or untrusted submission destination. The long-running domain continuity and clean external reputation are consistent with an established site rather than a newly created impersonation domain.

EVIDENCE

- The homepage displays “Human Verification,” a CAPTCHA challenge, and a JavaScript requirement; no commercial or credential-collection form is present.
- The domain was first archived on 2008-04-15 and has 842 archive snapshots spanning 2008-04-15 to 2026-08-07, with 19 years tracked.
- External checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit for the domain.

Regulatory Verification Notes

The available evidence supports an apparently legitimate, established website, but the real-world operator identity is not independently verified by the supplied material. The captured homepage does not expose licensing, registration, or detailed legal-entity disclosures, so regulatory status and applicable banking-service permissions remain matters for independent confirmation rather than conclusions from this assessment. A separate broker-reputation dataset produced no match; that is contextual only and is not a licensing determination. The observed transport certificate and hosting identity provide strong technical consistency with the apparent institutional presentation, but neither independently proves the operator’s legal status.

EVIDENCE

- The site is served on AS38730, identified as VIETINBANK-AS-VN - VIETINBANK-VN, VN.
- The transport certificate is EV, issued by GlobalSign GCC R3 EV TLS CA 2025, with validity ending 2027-01-09T02:51:31+00:00.
- The certificate subject organization is “Vietnam Joint Stock Commercial Bank of Industry and Trade.”
- The captured homepage is titled “Human Verification” and contains no visible licensing or legal-entity disclosure.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm that the domain is the official banking channel through an offline or separately sourced bank contact route. The applicable legal entity, banking permissions, account terms, complaint process, and payment-protection arrangements should be checked against authoritative institutional or regulatory records before material transactions are initiated.

EVIDENCE

- The homepage capture is an access gate rather than a substantive banking or legal-information page.
- The page provides no visible forms, service terms, licensing information, or regulatory identifiers in the captured content.
- The apparent institutional identity is supported by the certificate subject and hosting organization, but independent identity verification remains outstanding.

Summary Verdict

The overall posture is **high trust and low risk**, with the available technical, historical, and reputation evidence consistent with an established, apparently legitimate website. The principal qualification is that the real-world operator identity has not been independently verified, so the classification supports confidence in the site’s observed security posture without constituting proof of legal ownership.

Infrastructure Integrity

The site resolves to one identified likely origin IP, with no CDN or WAF vendor indicated in the supplied infrastructure facts. This provides a comparatively direct hosting path and does not introduce an observed origin-obfuscation concern; the hosting organization and valid EV certificate are mitigating technical signals, not standalone proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the observed low-risk posture, while independent confirmation of official channels and applicable account and payment safeguards should precede credential submission or consequential financial activity.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vietinbank.vn.

- The request stayed on vietinbank.vn. It was not redirected to another domain. [CLEAR](#)
- The earliest public archive of this site is from 2008-04-15. [CLEAR](#)
- It is hosted on VIETINBANK-AS-VN, from a server in VN. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vietinbank.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
