- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Vietnam News is an established Vietnamese online news publisher covering politics, law, business, economy, science and technology, society, lifestyle, sports, opinion, travel and world affairs. Its homepage presents editorial articles, multimedia content, an electronic paper, sponsored-content services and publishing/contact information, indicating an informational media model monetized primarily through advertising, sponsorships, subscriptions and related placements rather than financial investment services.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent news-media identity across its homepage and historical records, with no detected phishing, impersonation, malicious-content, hidden-form, wallet-drainer or suspicious-script indicators. External reputation checks found no malicious or suspicious detections, and the site's content and behavior are consistent with ordinary editorial publishing. The operator's real-world identity is not independently verified, so the evidence supports an apparently legitimate established website without proving the legal identity behind it.

EVIDENCE

- Historical domain continuity dates to 2011, with an authoritative domain age of 14.825462012320328 years.
- Web archives recorded 5000 snapshots across 12 years, from 2011-10-13T19:37:31Z through 2022-02-27T08:12:57Z.
- The homepage contains substantial news content and navigation across politics, economy, society, science, lifestyle, sports and world coverage; no phishing or brand-impersonation indicators were detected.
- External reputation assessment recorded 0 malicious detections, 0 suspicious detections and no confirmed blacklist or phishing hit.

Regulatory Verification Notes

The available site content is consistent with a national news publisher and includes About Us, Contact Us, publishing-oriented content, Brandinfo and an electronic-paper section. No financial-service license or registration number is claimed in the supplied content; for this apparent media business, that is a disclosure point rather than evidence of a scam. The operator's legal identity is not independently established by the

available evidence, and the separate broker-context check produced no match. Transport security is valid, although the certificate uses domain validation rather than organization validation.

EVIDENCE

- The homepage is served on AS54994 by “ML-1432-54994 - Meteverse Limited., CA”.
- The site uses a valid DV TLS certificate issued by RapidSSL TLS RSA CA G1, valid to 2026-09-22T23:59:59+00:00.
- The homepage identifies the publication as “Vietnam News” and provides About Us, Contact Us, E-Paper and Brandinfo navigation.
- No financial license claim or license number appears in the supplied page-level content.

What to Verify Next

Before any credential or payment interaction, an organization should independently confirm the publisher’s legal entity and official contact channels through a trusted offline or separately sourced route. If a paid subscription, sponsored placement or other commercial service is involved, the applicable terms, cancellation and refund arrangements, and payment-provider protections should be checked directly. Any future offering that extends beyond ordinary publishing should be assessed against the relevant regulatory registry before engagement.

EVIDENCE

- The homepage exposes About Us and Contact Us pathways that can be used for independent identity and service confirmation.
- The site presents E-Paper and Brandinfo sections, indicating potential subscription and commercial-publishing activity requiring review of applicable terms.
- Browser analysis found 0 sensitive forms and no untrusted form destination on the homepage.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification supports normal editorial use, while the absence of independent operator verification means it should not be treated as proof of the underlying legal identity.

Infrastructure Integrity

The site resolved to one address identified as a likely origin, with no detected CDN, edge-IP layer or trusted CDN/WAF intermediary. This provides less intermediary shielding than a CDN-fronted deployment, but it is an infrastructure characteristic rather than evidence of malicious activity.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making payments, independent confirmation of merchant identity, applicable terms, return or cancellation rights and payment protection remains appropriate.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vietnamnews.vn.

- The request stayed on vietnamnews.vn. It was not redirected to another domain. [CLEAR](#)
- The earliest public archive of this site is from 2011-10-13. [CLEAR](#)
- It is hosted on ML-1432-54994, from a server in CA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vietnamnews.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
