Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Vietnamese ecommerce storefront operated under the Viettel Store brand, presenting consumer electronics, household appliances, mobile plans, telecommunications services, promotions, installment-payment options, delivery support, physical-store lookup, order tracking, and customer-account facilities.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, or other fraud indicators were observed. The homepage presents a coherent retail model with priced merchandise, warranty references, delivery information, and integrated online and physical-store services. Automated interaction testing also found no cloaking, hidden forms, external password submission, clipboard interference, cryptocurrency-wallet activity, or credential-harvesting behavior. External threat-reputation checks were clean, while the site holds an established global traffic position and moderate page authority.

- The homepage consistently identifies itself as Viettel Store and provides product catalogues, prices, promotions, a store locator, order tracking, a shopping cart, and account access.
- The homepage contained no sensitive form, hidden form, untrusted form destination, or detected brand-impersonation indicator.
- Behavioral testing completed two successful runs without cloaking, wallet-provider activity, wallet-drainer behavior, clipboard hijacking, or externally submitted passwords.
- External reputation telemetry recorded zero malicious and zero suspicious detections, no malicious safe-browsing result, no external threat listing, and a global traffic rank of 64,924.

Regulatory Verification Notes

The observed business is conventional consumer-electronics and telecommunications retail rather than an investment, brokerage, or virtual-asset service. The supplied homepage does not make a financial-services licensing claim, and the available evidence does not establish that sector-specific authorization is relevant to its principal retail activity. Organizational identity is materially supported by an organization-validated certificate issued to the Vietnamese state-owned Viettel trading and import-export company; no conflicting legal-entity name was identified.

- The homepage describes sales of phones, laptops, tablets, wearables, accessories, appliances, SIM packages, and telecommunications services, including installment-purchase offers.
- The site's transport encryption uses an OV certificate issued by GlobalSign RSA OV SSL CA 2018 to "CÔNG TY TNHH NHÀ NƯỚC MTV THƯƠNG MẠI VÀ XUẤT NHẬP KHẨU VIETTEL," valid until 2026-11-26.

- The hosting infrastructure is served from AS7552, operated by VIETEL-AS-AP – Viettel Group, VN.
- The available broker-intelligence context contained no matching broker record; this is contextual only and does not determine the retailer’s legal or licensing status.

What to Verify Next

For procurement, financing, or other institutionally significant engagement, counterparties should confirm the contracting entity shown during checkout, reconcile invoice and payment-recipient details with the transaction documentation, and review the applicable warranty, returns, delivery, and installment-financing terms. Official contact channels may also be independently confirmed before unusually large or non-routine orders.

- The homepage offers installment payments, making the named financing provider, cost schedule, and customer obligations relevant to transaction review.
- Warranty references and delivery information are presented on the storefront, providing the source material against which contractual terms can be checked.
- Store lookup, order tracking, telephone assistance, and account access provide multiple operational channels for confirming an order or customer relationship.

Summary Verdict

The website is legitimate, established, and trustworthy, with a coherent commercial identity, clean threat reputation, credible organizational validation, meaningful traffic presence, and no contradictory fraud signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is directly hosted on Viettel Group infrastructure in Vietnam, with one resolved likely-origin address and no CDN or WAF detected. Direct origin visibility provides less edge-layer shielding than a CDN-based deployment, but the identified operator alignment and valid organization-validated TLS materially support infrastructure integrity; protective architecture alone is not treated as proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal account and purchasing activity while applying routine payment, order-confirmation, and contractual controls appropriate to ecommerce transactions.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of viettelstore.vn.

- The request stayed on viettelstore.vn. It was not redirected to another domain. CLEAR
- It is hosted on VIETEL-AS-AP, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about viettelstore.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
