Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is the Viettel Telecom corporate and service portal, presenting mobile, 5G, internet, television, camera, device, enterprise technology, and digital services alongside pricing, support, online payment, and account-management functions. Its apparent business model is recurring telecommunications subscriptions supplemented by device and related-product sales.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, historical continuity, and external reputation signals. The homepage presents a coherent telecommunications business with service categories, customer-support functions, online payments, and corporate legal information rather than deceptive investment, credential-harvesting, or impersonation mechanics. External checks found no malicious or suspicious detections, no blacklist hit, no abuse reports, and no suspected brand impersonation.

- The homepage identifies Viettel Telecom and presents mobile, internet, television, device, enterprise, and digital-service offerings.
- The domain was registered in 2008 and is approximately 18 years old.
- Historical coverage comprises 1,438 archive snapshots spanning 2008–2026, with 19 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports.

Regulatory Verification Notes

The site provides corporate legal information and a clear commercial identity, while its telecommunications and subscription model is presented with service, pricing, support, and payment information. No specific license number or regulator-facing registration claim is disclosed in the supplied page evidence; this is a transparency item for regulatory confirmation, not an indication of impersonation or fraud. The absence of a matching broker record is contextual reputation support only and is not a licensing determination.

- Homepage content identifies Viettel Telecom as a telecommunications and technology provider with customer-service and legal-information sections.
- The site is served from AS7552, VIETEL-AS-AP – Viettel Group, VN.
- TLS uses GlobalSign RSA OV SSL CA 2018 with OV validation and is valid to 2027-01-03.
- Page authority is assessed in the high band.

What to Verify Next

For regulated procurement or high-value commercial arrangements, confirm the entity's applicable telecommunications authorization and registration details through the relevant Vietnamese regulator or corporate registry. Contractual terms, pricing, payment instructions, and support channels should be reconciled across the site's legal, service, and customer-support pages before execution.

- Corporate legal information is available on the site and can serve as the reference identity for registry checks.
- Service pages provide the relevant commercial terms and pricing context for comparison.
- Customer-support pages provide channels for resolving discrepancies before a transaction.

Summary Verdict

Viettel Telecom presents as a legitimate, established, and trustworthy telecommunications provider with strong alignment between its business presentation, historical continuity, technical identity, and external reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to four likely origin addresses and does not use a detected CDN or WAF edge layer. Its infrastructure is nevertheless coherently associated with Viettel Group, and the site uses organization-validated TLS issued to VIETTEL TELECOM CORPORATION – BRANCH OF VIETTEL GROUP; these controls support transport integrity but are mitigating signals rather than proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal account, service, payment, and support interactions, subject to ordinary commercial and regulatory due diligence for the specific service involved.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vietteltelecom.vn.

- The request stayed on vietteltelecom.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2008-08-03. CLEAR
- It is hosted on VIETEL-AS-AP, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vietteltelecom.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
