

Is vinahost.vn legit? TrustSniffer's high-trust assessment: 90/100

vinahost.vn

Verdict

90

OUT OF 100

HIGH TRUST

vinahost.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking Vietnamese hosting and domain registrar site (VinaHost). Clear product pages for domains, VPS, cloud, dedicated servers, SSL, WAF, pricing, contact info, legal registration and multiple payment methods. Appears to be an established commercial provider with typical support channels.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

VinaHost is a Vietnamese commercial technology-services website presenting domain registration, hosting, VPS, cloud, dedicated-server, email, SSL, WAF, and related infrastructure services. Its apparent business model is conventional online commerce based on one-time registrations, recurring subscriptions, add-on services, and payments through bank transfer and online gateways.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there were no phishing, impersonation, malicious-reputation, or blacklist indicators, and the site presents a coherent hosting-provider identity rather than a deceptive imitation. Its long-running historical continuity and substantial public footprint are consistent with an established website. The real-world operator identity is likely but not independently verified, so the legitimacy assessment remains evidence-consistent rather than proven.

EVIDENCE

- The archive record shows 859 snapshots spanning 2007–2026, covering 20 tracked years with a maximum gap of 1 year.
- The domain record indicates registration continuity of 19.071868583162217 years.
- The homepage is categorized as a corporate hosting provider and contains no reported phishing, brand-impersonation, or other red-flag findings.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or Google Safe Browsing malicious finding.

Regulatory Verification Notes

The site provides legal, contact, pricing, and service-policy material, alongside conventional offerings such as domains, VPS, cloud, dedicated servers, SSL, and WAF. However, the available evidence does not identify a claimed regulatory license, licensing authority, or license number; this is a verification point concerning disclosure and service scope, not evidence of deception. The site's visible login, registration, and payment forms are consistent with its stated subscription and ecommerce model, while the presence of a domain-registration and hosting business does not by itself establish regulated financial status. A separate broker-reputation dataset produced no match, which is contextual only and not a licensing determination.

EVIDENCE

- The homepage and service navigation identify domain registration, hosting, VPS, cloud, dedicated servers, email, SSL, and WAF services.
- The contact and legal sections are represented in the site navigation, including contact information, policies, payment information, and legal-registration content.
- The site is hosted on AS7643, VNPT-AS-VN – Vietnam Posts and Telecommunications (VNPT), Vietnam.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid through 2026-12-22T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant identity shown in the site's legal materials, the applicable registration or licensing position for the specific service being purchased, and the published terms governing renewals, cancellations, refunds, support, and data handling. Payment should use a method with suitable dispute and payment-protection mechanisms, and contact channels should be confirmed through an independently sourced route rather than relying solely on information presented within the site.

EVIDENCE

- The account area includes login and registration functions, while the checkout flow supports payment activity.
- The site presents pricing, promotions, payment information, and service-policy navigation relevant to subscription and renewal review.
- The site links to multiple conventional support and social channels, including Zalo, Facebook, YouTube, LinkedIn, Twitter, Instagram, and GitHub.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, impersonation, phishing, or blacklist contradiction was identified, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site resolves to a single direct hosting address, with no CDN or WAF edge detected and a likely origin address visible in the observed resolution. This provides less intermediary shielding than a CDN-backed deployment, but it is a neutral infrastructure characteristic and does not contradict the broader trust assessment.

Closing Assessment

Standard browsing and ordinary service evaluation are proportionate; credential or payment use should follow the independent merchant, terms, licensing-scope, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vinahost.vn.

- The request stayed on vinahost.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2007-07-15. CLEAR
- It is hosted on VNPT-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vinahost.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
