Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Visdeal.nl is a Dutch online fishing retailer presenting discounted rods, reels, tackle, clothing, outdoor equipment, customer reviews, shipping and payment information, returns support, customer service, and promotional offers for direct-to-consumer sales.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The homepage presents a coherent retail model centred on fishing equipment, including carp, predator, freshwater, trout, catfish, and sea-fishing products, rather than a deceptive financial or credential-harvesting proposition. Promotional countdowns, discounts, cookie consent, and reCAPTCHA are consistent with ordinary ecommerce operations.

- Homepage: clearly structured product categories, pricing, shopping-cart functionality, customer service, returns, and payment information.
- Homepage: no login form, hidden sensitive form, wallet interaction, or suspicious destination was detected.
- External reputation checks: zero malicious and zero suspicious detections, with no blacklist or phishing match reported.
- Homepage: no brand-impersonation signal or content red flag was identified.

Regulatory Verification Notes

The site functions as a conventional consumer-goods retailer rather than a regulated financial service. No financial licence is claimed in the supplied evidence; this is a limited disclosure point for ordinary commercial due diligence, not an identity contradiction. The domain's registration through Key-Systems GmbH and its established historical presence support continuity, while the available reputational context is clean.

- Domain registration: created 2011-02-07; age 15.49 years.
- Web archive: 289 snapshots spanning 2003–2026, tracked across 24 years.
- Registrar: Key-Systems GmbH.
- Transport encryption: TLS issued by WE1, DV validation, valid to 2026-10-20.

What to Verify Next

Before a material purchase, review the terms, returns, payment, privacy, and contact pages for the applicable seller details, refund conditions, and consumer protections. For higher-value orders, confirm the published

support channels through an independent route and retain order and payment documentation.

- Terms and returns pages: confirm contractual conditions and refund procedures.
- Payment page: confirm available payment methods and transaction protections.
- Contact page: validate the merchant's customer-service route.
- Privacy page: review personal-data and cookie-handling disclosures.

Summary Verdict

The site presents as a legitimate, established, and trustworthy ecommerce business with a coherent commercial purpose and no observed contradiction requiring heightened concern. Normal interaction, including account login and standard purchasing activity, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, with observed traffic served through AS13335 edge infrastructure; the origin server was not observable in this analysis. This reduces direct exposure of the origin and is a mitigating security characteristic, but does not independently establish legitimacy.

Closing Assessment

Proceed with normal ecommerce use, applying routine purchasing controls such as reviewing transaction terms and retaining confirmation records.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of visdeal.nl.

- The request stayed on visdeal.nl. It was not redirected to another domain. CLEAR
- Registration is published under Key-Systems GmbH. CLEAR
- DNS for this domain is served by creation, across 4 name servers. NOTED
- The earliest public archive of this site is from 2003-03-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about visdeal.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
