Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

VISION+ is a consumer streaming service offering television, films, series, live sports, originals, children's programming, catch-up content, and subscription package purchases through the visionplus.id website.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting legal-identity signals were observed. The site's content is coherent with a consumer media subscription service, and its substantial historical continuity, established traffic footprint, and clean external reputation support an apparently legitimate operating presence. Runtime analysis did identify dynamic external requests and substantial post-interaction page changes, but it found no hidden forms, external password forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts; these observations do not establish a scam pattern in the context of the site's normal streaming functionality.

EVIDENCE

- The domain was registered on 2019-12-06 and is approximately 6.68 years old, according to its registration record.
- Historical records show 710 snapshots from 2020-02-04 through 2024-02-12, covering 5 tracked years with continuous activity.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections; no phishing or impersonation match was identified.
- Runtime capture recorded 40 external XHR requests and 33 external POST requests, while detecting 0 hidden forms, 0 external password forms, 0 wallet-provider runs, and 0 cloaking events.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate media platform, but the real-world operator identity is not independently verified. The footer provides Terms of Use, Privacy Policy, Software Licenses, and a copyright notice for VISION+; however, the supplied pages do not present a regulatory license, registration number, or clearly identified legal operating entity. For this subscription-media business model, that is a transparency and merchant-verification point rather than evidence of deception. The domain is registered through PT Registrasi Neva Angkasa, and the site's transport security and hosting arrangements are technically established.

EVIDENCE

- The homepage footer links to Terms of Use, Privacy Policy, and Software Licenses and displays “Copyright © 2025 VISION+ All rights reserved.”
- The site is served from AS16509, Amazon.com, Inc. (AMAZON-02), US.
- The TLS certificate uses Amazon RSA 2048 M01, has DV validation, and is valid through 2026-12-08.
- The registrar is PT Registrasi Neva Angkasa; the recorded domain expiration date is 2026-12-06.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the domain is the service's official digital channel, identify the contracting merchant shown at checkout, review the applicable subscription, cancellation, refund, and privacy terms, and confirm payment protections offered by the selected payment method. Licensing or registration should be checked with the relevant authority only if a particular service or jurisdiction makes such authorization applicable. Official support and contact channels should be confirmed through an independent route, such as an established application marketplace or a previously trusted provider channel.

EVIDENCE

- The homepage provides “Log in/Register” and “Buy Package” actions, creating distinct account and payment checkpoints for review.
- The homepage identifies the service as “VISION+: Streaming TV, Film, Series & Sports” and presents program categories, schedules, and branded content.
- The site's legal-navigation area includes Terms of Use, Privacy Policy, and Software Licenses for review before account or subscription use.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established, apparently legitimate website and no observed contradiction-based scam indicators. The principal residual uncertainty concerns independent confirmation of the real-world operator rather than evidence of malicious website activity.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed traffic terminating on AWS edge servers rather than exposing a directly attributable origin system. This is a mitigating security and resilience measure, not independent proof of the operator's legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; account creation or payment should follow ordinary independent checks of merchant identity, contractual terms, and payment protection.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of visionplus.id.

- The request stayed on visionplus.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Registrasi Neva Angkasa. CLEAR
- DNS for this domain is served by awsdns-19.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-06. NOTED
- The earliest public archive of this site is from 2020-02-04. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about visionplus.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
