

Is vitaminer.com.br legit? TrustSniffer's high-trust assessment: 75/100

vitaminer.com.br

Verdict

75

OUT OF 100

HIGH TRUST

vitaminer.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 60%.

What this site appears to be

Portuguese-language Brazilian online store with a large catalog of imported vitamins, supplements, sports-nutrition products, wellness goods, and health-related merchandise. The page includes category navigation, featured brands, product prices, ratings, free-shipping offers, account access, order tracking, a shopping cart, and checkout prompts.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Brazilian e-commerce storefront selling imported vitamins, dietary supplements, sports-nutrition products, wellness goods, and selected health merchandise through a conventional retail model with visible prices, product ratings, account access, order tracking, cart functions, and checkout.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or deceptive transaction mechanics were observed. The content is extensive and commercially coherent, and the domain has a multi-year operating history without evidence of suspicious repurposing or material thematic drift. External reputation is substantially clean: one isolated, unconfirmed malicious classification is outweighed by the absence of broader threat detections, reported abuse, matching malicious signatures, or adverse browser-protection findings.

- The domain was registered in 2021 and is approximately 4.84 years old; its registration record identifies Ob2 Atividades de Internet Ltda as the owner.
- The web archive contains 51 snapshots spanning 2024–2025, representing 2 years of tracked coverage; the historical analysis found no suspicious repurposing or semantic drift.
- The homepage contained no hidden or sensitive forms, suspicious inline scripts, cloaking, clipboard manipulation, cryptocurrency-wallet behavior, or detected brand impersonation.
- External reputation telemetry recorded 57 harmless classifications, 34 undetected classifications, and one unconfirmed malicious classification; browser-protection checks were clean, with zero abuse reports and no signature matches.

Regulatory Verification Notes

The supplied homepage presents an ordinary retail business rather than a financial, brokerage, or investment service, so the absence of a financial-services licence claim is not anomalous. However, the analyzed content does not establish what product-specific Brazilian registrations, import authorizations, or health-related compliance controls apply to individual supplements, over-the-counter products, or medical-adjacent goods. This is a product-compliance due-diligence matter, not evidence of fraud or impersonation.

- The homepage categorizes merchandise across supplements, sports nutrition, over-the-counter treatments, diabetes-care products, glucose-monitoring supplies, insulin injectors, and respiratory-care accessories.
- The site's observed revenue model is direct retail sale through a shopping cart and checkout, with no investment, brokerage, cryptocurrency, or yield-generating proposition.

- No broker identity was matched in the supplied third-party broker-intelligence context, consistent with the site’s non-broker retail business model.

What to Verify Next

For procurement or higher-value purchasing, the relevant product registration or import status should be checked against the applicable Brazilian authority, particularly for regulated health products. Product authenticity should be confirmed through manufacturer lot details and authorized-distributor channels, while fulfilment terms, returns, taxes, and cross-border delivery obligations should be reviewed before purchase. Official service channels should also be confirmed independently for any order dispute.

- The homepage advertises a catalog exceeding 300,000 products and 40,000 brands, making supplier and product-level validation more meaningful than a single site-wide check.
- Product pages and shopping features present prices, ratings, free-shipping offers, order tracking, and checkout prompts—the transaction terms most relevant to pre-purchase review.
- The homepage includes help, customer-service, order-management, and tracking functions that provide practical reference points for confirming fulfilment support.

Summary Verdict

The website is a legitimate, established, and trustworthy retail operation with coherent commercial content and no observed identity or impersonation contradictions. The available technical, historical, behavioral, and reputation evidence converges on a high-trust posture. Normal interaction, including account login, checkout, and standard use, is appropriate.

Infrastructure Integrity

The site uses Cloudflare’s CDN and web-application firewall, with all observed addresses belonging to edge infrastructure; this reduces direct exposure of the origin server but is a security-control signal rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc.), with observed edge addresses in the United States.
- Transport encryption uses a valid WE1-issued domain-validated TLS certificate, valid until 2026-10-04.
- The observed Cloudflare edge addresses were 104.26.12.227, 104.26.13.227, and 172.67.70.37.

Closing Assessment

Prospective customers may use the site normally, applying standard e-commerce diligence to product authenticity, transaction terms, and order records.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vitaminer.com.br.

- The request stayed on vitaminer.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-29. NOTED
- The earliest public archive of this site is from 2024-04-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vitaminer.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
