- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Vlebazar is an established Indian e-commerce storefront selling new and refurbished smartphones, laptops, biometric devices, books, accessories, and other consumer goods through conventional retail transactions, with nationwide delivery, replacement, refund, payment, and customer-service facilities.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The storefront's claimed scale—"Trusted by 30 Lakh+ Customers"—and statement that it has served India since 2015 are marketing assertions not independently substantiated by the supplied page evidence, but they do not outweigh the site's long operating history, consistent retail identity, and clean external reputation. Some advertised reductions are unusually large, including a refurbished Lenovo ThinkPad discounted by 89%; this warrants ordinary product-level scrutiny concerning condition, warranty, and reference pricing rather than suspicion toward the website itself.

- The homepage presents a consistent electronics-retail identity and contains no detected brand-impersonation or page-level fraud indicators.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or external threat-list hit.
- The domain was registered in 2017 and is approximately 8.82 years old; registration identifies VLE BAZAAR PRIVATE LIMITED through GoDaddy.com, LLC.
- The archive contains 259 snapshots spanning 2018–2026, representing 9 years of tracked history without detected repurposing or semantic drift.

Regulatory Verification Notes

The available site content identifies a conventional goods retailer rather than a regulated financial or investment service. It provides a Gurgaon business address and links to delivery, return, replacement, and refund policies, while the domain registration names a corresponding private limited company. No sector-specific licence is claimed in the supplied content; for this business model, the more relevant governance considerations are corporate identity, consumer-protection terms, invoicing, warranties, and fulfilment obligations. The absence of a match in the supplied broker-intelligence dataset has no adverse significance for an electronics retailer.

- The homepage identifies the business as an online electronics retailer and publishes a Gurgaon business address alongside customer-service and policy references.

- The storefront advertises free delivery across India, seven-day replacement, traceable shipping, and secure payments.
- The site is served from AS147237 by CLOUDMINI-AS-IN — CLOUDMINISTER TECHNOLOGIES PRIVATE LIMITED, IN.
- The site’s transport encryption uses an R12-issued domain-validated TLS certificate, valid until 2026-08-04 14:32:51 UTC.

What to Verify Next

Before a material purchase, the purchaser should confirm that the checkout invoice names the registered company, review the return and replacement conditions applicable to the selected item, and establish whether a refurbished device includes a seller or manufacturer warranty. Product model, condition, included accessories, delivery timeline, and refund eligibility should be retained in the order record, particularly where the displayed reduction is substantial.

- The homepage distinguishes refurbished products within individual listings, making item-specific condition review possible before purchase.
- Product pages expose listed rupee prices and purchasing controls such as “Add to Cart” and “Buy Now.”
- The site supplies policy links covering delivery, replacement, returns, and refunds.
- The observed interactive behavior showed no cloaking, hidden forms, clipboard hijacking, suspicious scripts, or untrusted external form destinations.

Summary Verdict

The website presents as a legitimate, established, and trustworthy retail operation. Its consistent commercial identity, sustained historical presence, clean threat reputation, meaningful traffic footprint, and conventional transaction model provide strong convergent support for a high-confidence trust posture.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with the observed address operating as an edge endpoint rather than a directly exposed origin. This reduces origin-server exposure and provides a meaningful security mitigation, although protective infrastructure alone is not evidence of business legitimacy.

Closing Assessment

Normal browsing, account login, and standard purchases are appropriate, subject to the usual review of item-specific terms and transaction records expected for online retail.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vlebazaar.in.

- The request stayed on vlebazaar.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-10-08. CLEAR
- The earliest public archive of this site is from 2018-02-13. CLEAR
- It is hosted on CLOUDMINI-AS-IN, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vlebazaar.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
