

Is vnpay.vn legit? TrustSniffer's high-trust assessment: 90/100

vnpay.vn

Verdict

90

OUT OF 100

HIGH TRUST

vnpay.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking Vietnamese fintech corporate site describing VNPAY products (gateway, POS, QR, invoicing), contact information, company registration, and merchant services.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Vietnamese corporate fintech website presenting VNPAY's electronic-payment ecosystem, including merchant payment services, consumer applications, and integrations for everyday transactions. Its apparent business model is to provide payment infrastructure and related services to merchants, partners, banks, and consumers.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, blacklist, or malicious-reputation finding. The homepage presents a coherent corporate identity and payment-services profile, while technical behavior showed no login form, hidden sensitive form, wallet connection, clipboard activity, or cloaking. The long-running historical continuity of the domain and clean external reputation further support an established-site interpretation, although the real-world operator remains independently unverified.

EVIDENCE

- The homepage identifies the organization as "VNPAY - Công ty Cổ phần Giải pháp Thanh toán Việt Nam" and presents a corporate fintech profile without reported red flags.
- The homepage capture exposed no login form, hidden form, password submission, wallet-provider activity, or wallet-drainer behavior.
- Domain registration continuity: registered 2008 (~18.56 years old).
- Web-archive history: 392 snapshots spanning 2008–2026, covering 19 years.

Regulatory Verification Notes

The site presents payment gateway, POS, QR-payment, electronic-invoicing, merchant-service, and consumer-application offerings. Its corporate and contact material reportedly includes company registration details, but no specific license number or licensing authority is disclosed in the supplied page evidence; this is a verification gap rather than evidence of fraud. The available third-party broker context contains no adverse match, and the site's business model is consistent with a corporate payment-services portal. Transport security also provides a concrete integrity signal, though it does not independently establish operator identity or regulatory authorization.

EVIDENCE

- The homepage and corporate material describe payment gateway, POS, QR, invoicing, merchant, and partner services.
- The site's transport encryption uses an OV certificate issued by GlobalSign RSA OV SSL CA 2018 for Viet Nam Payment Solution Joint Stock Company, valid to 2027-01-13.
- Hosting telemetry: served from AS140770, DIGILIFE-AS-VN – Digilife Vietnam Digital Services Company Limited, VN.

What to Verify Next

Before credential or payment interactions, independently match the legal entity shown on the site with the applicable Vietnamese corporate registry and confirm any payment-service authorization directly with the relevant regulator or registry. Standard commercial checks should also confirm the applicable service terms, liability arrangements, dispute process, and payment-protection mechanisms through independently sourced channels.

EVIDENCE

- The available evidence does not independently verify the connection between the domain and a specific real-world operator.
- The reviewed material does not establish a license number or licensing authority for the payment services described.
- The site presents sufficient corporate and service information for an external registry and authorization cross-check.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified, while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves to infrastructure operated by Digilife Vietnam Digital Services Company Limited on AS140770 in Vietnam. No CDN or WAF was detected, and the resolved infrastructure includes two likely origin IPs; this means the site does not benefit from an identified edge-protection layer, but the hosting arrangement itself presents no confirmed malicious indicator in the supplied evidence.

Closing Assessment

Normal business evaluation is proportionate, with independent merchant-identity, service-term, and payment-protection checks completed before entering credentials or authorizing payments.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vnpay.vn.

- The request stayed on vnpay.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2008-01-18. CLEAR
- It is hosted on DIGILIFE-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vnpay.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
