Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents itself as the official Vietnam Post corporate and public-service portal, offering postal and parcel delivery, logistics, e-commerce, payment, financial, insurance, and related customer services through a national branch network. Its apparent business model is the provision of transaction-based delivery, logistics, retail, payment, and financial-partner services.

Scam/Impersonation Risk

No contradictions were observed. The site's Vietnamese and English presentation, “Vietnam Post – Tổng công ty Bưu điện Việt Nam” branding, postal and logistics service structure, branch-network references, customer-support content, and linked social presence form a coherent institutional profile. The domain is long-established, has strong historical continuity, and maintains an established traffic footprint; external reputation checks found no malicious or suspicious detections, and no phishing, impersonation, or brand-conflict indicators were identified. Interactive testing did observe hidden forms and substantial page-structure changes, but no login form, sensitive form, external password form, wallet interaction, cloaking, or untrusted form destination was identified, so these appear to be implementation or content-loading anomalies rather than evidence of deceptive activity.

EVIDENCE

- The homepage identifies “Vietnam Post – Tổng công ty Bưu điện Việt Nam” and presents postal, logistics, e-commerce, financial-service, support, and branch-network content.
- The domain was registered in 2006 and is approximately 19.76 years old; historical records show 1,194 archive snapshots spanning 2006–2025, with 20 years tracked.
- External reputation assessment recorded 0 malicious detections, 0 suspicious detections, and no phishing or impersonation match for the site.
- The site's social-navigation elements point to Facebook, Messenger, and Zalo, consistent with its public-service presentation.

Regulatory Verification Notes

The website's content is consistent with an established national postal operator and describes payment-gateway services, e-wallets, savings, consumer loans, insurance distribution, e-commerce, and logistics. Because these areas can involve regulated activities or third-party financial products, the available pages should not be treated as independent proof of licensing or of the legal entity responsible for each service. No license authority or

license number is disclosed in the supplied business-model evidence, making regulatory status a transparency item for confirmation rather than an indication of fraud. The available evidence supports apparent legitimacy, while the real-world operator identity remains likely rather than independently verified. A third-party broker-reputation comparison produced no match and should be regarded only as contextual support.

EVIDENCE

- The site's service menu includes “Cổng thanh toán” (payment gateway), e-wallet, savings, consumer loans, life and non-life insurance, e-commerce, postal delivery, and logistics services.
- The homepage and support/introduction areas provide institutional service information, customer-contact functions, recruitment content, and branch/service navigation.
- The site's hosting resolves through AS131438, identified as VNPOST-AS-VN – VIETNAM POST, VN.
- The site's TLS certificate is OV-validated, issued by GeoTrust TLS RSA CA G1 for VIETNAM POST, and valid through 2026-10-17.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer counterparty should independently confirm the responsible corporate entity and any permissions applicable to the particular financial, insurance, payment, or e-commerce service through the relevant official registry. The counterparty should also review the applicable terms, privacy, cancellation, refund, delivery, and dispute procedures, and confirm official support channels through an independently obtained contact route rather than relying solely on page-presented details.

EVIDENCE

- The site separates individual, enterprise, financial, delivery, logistics, support, and public-service navigation, so verification should be performed against the specific service being used.
- Financial and insurance functions are presented alongside ordinary postal services, creating a need to distinguish Vietnam Post services from partner-provided products.
- The site provides support and customer-contact navigation that can be cross-checked through an independent official channel.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed. The assessment supports normal website use in principle, but it does not independently prove the real-world operator identity or the authorization of every service presented.

Infrastructure Integrity

The site resolves directly to infrastructure identified with Vietnam Post rather than through a detected CDN or WAF intermediary. This provider-aligned hosting relationship is a useful mitigating context, although hosting alignment alone is not proof of legitimacy.

EVIDENCE

- Infrastructure resolution recorded one direct host, no detected CDN, no detected WAF vendor, and a likely origin host.
- The resolved infrastructure is associated with Vietnam Post in Vietnam and is registered through APNIC.

Closing Assessment

Ordinary browsing and service evaluation are proportionate to the available evidence; before submitting credentials, making payments, or entering a financial arrangement, the counterparty should complete the service-specific identity, authorization, terms, and payment-protection checks described above.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vnpost.vn.

- The request stayed on vnpost.vn. It was not redirected to another domain. [CLEAR](#)
- The earliest public archive of this site is from 2006-11-04. [CLEAR](#)
- It is hosted on VNPOST-AS-VN, from a server in VN. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vnpost.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
