

Is vntelecom.com.br legit? TrustSniffer's high-trust assessment: 100/100

vntelecom.com.br

Verdict

100

OUT OF 100

HIGH TRUST

vntelecom.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Portuguese-language corporate website for VN Telecom, a regional fiber-optic internet provider in Pernambuco. It promotes internet plans and installation, explains the company's mission and history, provides a general contact form, subscriber resources, operating hours, telephone and social channels, and identifies the operating company with CNPJ 14.841.815/0001-08.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate service portal of VN Telecom, a regional telecommunications provider offering residential fibre-optic internet plans in Pernambuco, Brazil, with facilities for installation requests, subscriber support, billing, account access, and mobile-app services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behaviour, or other scam indicators were observed. The site's established historical footprint, clean external threat reputation, consistent telecommunications content, and benign interaction behaviour collectively support the conclusion that it represents the legitimate VN Telecom business rather than a deceptive copy.

- The domain archive contains 638 snapshots spanning 2012–2026 (15 years tracked), with no detected repurposing or semantic category shift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and no external blacklist finding for the assessed domain.
- The homepage presented one ordinary contact form, with no password field, hidden form, untrusted submission destination, cloaking, suspicious script, or brand-impersonation indicator.
- Registration records identify VN TELECOM PROVEDORES A.R.C EIRELI as the owner; registered 2021 (~5.3 years old), with registration extending to 2028.

Regulatory Verification Notes

The homepage identifies the operating company through CNPJ 14.841.815/0001-08 and presents a coherent corporate identity, service proposition, mission, history, and privacy-policy navigation. No telecommunications licence or regulatory authorisation number was identified in the supplied page content, so the site itself does not establish the status or scope of any sector-specific authorisation; this is a limited disclosure matter, not evidence of fraud.

- The homepage names VN Telecom and displays CNPJ 14.841.815/0001-08 alongside its corporate and customer-service content.
- The homepage describes the company as serving Pernambuco and states an operating-history claim of more than 20 years.
- The hosting infrastructure is served from AS47583 (AS-HOSTINGER — Hostinger International Limited, CY).
- The site's transport encryption uses a TLS certificate issued by YR2 (DV), valid to 2026-09-03.

What to Verify Next

For procurement, regulated onboarding, or material contractual commitments, the legal entity and CNPJ should be confirmed through the appropriate Brazilian corporate registry, while any required telecommunications authorisation should be checked with the competent regulator. Commercial terms, coverage, installation charges, recurring fees, and cancellation conditions should be reviewed before service activation. Official support and payment channels can be independently confirmed using the company’s published telephone or physical-service information.

- The site provides telephone, operating-hours, social-media, and store-related contact information for independent channel confirmation.
- Subscriber-facing resources include account, billing, speed-testing, support, and application functions.
- The homepage invites prospective customers to request installation, making service coverage and contract terms relevant before ordering.

Summary Verdict

The site has a high-trust posture and is assessed as a legitimate, established regional telecommunications website. Its business identity, sustained public history, clean reputation, coherent content, and benign technical behaviour converge without contradictory risk signals.

Infrastructure Integrity

The site resolves directly to a single likely origin address in Lithuania and does not use a detected CDN or WAF edge layer. Direct origin exposure provides less network-layer shielding than a reverse-proxy deployment, but the resolved infrastructure is stable and no associated abuse pattern was identified; this remains a technical architecture observation rather than a legitimacy concern.

Closing Assessment

Normal interaction, including account login, installation requests, subscriber account actions, and standard payments, is appropriate, subject to ordinary contractual and payment controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vntelecom.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
