Full analysis

Overview

The website is an established Dutch omnichannel football retailer operated by Badge Direct B.V., presenting branded footwear, apparel, club and national-team merchandise, equipment, prices, discounts, shopping guidance, customer-service resources, and physical-store information for direct consumer sales.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or adverse threat-reputation findings were observed. The domain's long registration history, extensive archival record, established global traffic footprint, coherent retail content, and clearly attributed operator converge strongly in support of legitimacy. The homepage's product catalogue and ordinary ecommerce functions are consistent with its stated business purpose.

- Domain-registration records show registration through Registrar.eu on 4 January 1999 (~27.6 years old).
- The web archive contains 1,222 snapshots spanning 16 February 2003 to 1 July 2026 (24 years tracked), with no detected suspicious repurposing or semantic drift.
- External reputation checks recorded no malicious or suspicious classifications, no phishing finding, and no reported abuse; the domain ranks 54,714 globally.
- The homepage showed no suspected brand impersonation, credential-collecting login form, untrusted form destination, cryptocurrency functionality, or wallet interaction.

Regulatory Verification Notes

The site identifies Badge Direct B.V. as its operating company and presents the commercial disclosures expected of a mature consumer retailer, including delivery, returns, customer support, policies, and store locations. Its described activity is conventional merchandise retail rather than a financial or investment service; consequently, the absence of a financial-services licence claim is not adverse evidence. No conflicting legal-entity name was found in the supplied page content.

- The homepage attributes the business to Badge Direct B.V. and provides links to legal policies and customer-service information.
- Product listings on the homepage display merchandise categories, prices, discounts, and shopping guidance.
- The homepage identifies online sales alongside numerous physical retail locations.

- The broker-reputation dataset produced no match, which is consistent with the site's non-broker retail business model.

What to Verify Next

Before a material purchase, the purchaser should confirm the final price, delivery destination, return conditions, and payment recipient during checkout. For unusually large or business orders, the legal operator and relevant store or customer-service channel can be corroborated through an independent official business record or offline contact route.

- The homepage provides delivery and return information that can be compared with the final checkout terms.
- The site exposes customer-service and legal-policy links suitable for confirming order and cancellation conditions.
- Published physical-store locations provide an independent route for validating fulfilment or collection arrangements.

Summary Verdict

The website presents as a legitimate, established, and trustworthy ecommerce operation. Its coherent commercial identity, mature operating footprint, sustained provenance, and clean security reputation support normal interaction, including account login, account functions, and standard purchases.

Infrastructure Integrity

The site uses Cloudflare's mainstream CDN/WAF architecture. All four observed addresses were Cloudflare edge systems and no origin candidate was exposed, reducing direct origin-server exposure; this is a useful security mitigation, though not independent proof of business legitimacy. Transport encryption was valid and current at the time of assessment.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- The site's TLS certificate was issued by WE1 with domain validation (DV) and is valid until 24 October 2026.
- Infrastructure resolution identified four CDN edge addresses and no likely origin-server address.

Closing Assessment

Prospective customers may use the site normally, applying standard ecommerce diligence to checkout details and retaining order documentation for higher-value purchases.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about voetbalshop.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
