Full analysis

Overview

Vootbuy is an Indian online clothing storefront selling discounted sarees, ethnic wear, kids' apparel, and related fashion products directly to consumers through product catalogs, shopping-cart functionality, customer support, policies, and payment messaging.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents an ordinary retail model, including sarees, kurtis, lehengas, kids' wear, product discounts, prepaid-order shipping incentives, cart functionality, and newsletter signup. Promotional listings such as ₹1,299 sale prices against ₹3,999 regular prices are consistent with standard ecommerce activity, and no phishing, impersonation, financial-manipulation, or malicious-content indicators were identified. The site therefore presents as a legitimate established retailer.

- The homepage contains product catalogs, cart controls, customer support information, and consumer-shopping policies.
- External reputation checks recorded zero malicious or suspicious detections and no blacklist or phishing match.
- The domain was registered in 2022 and is approximately 3.71 years old.
- Historical records contain 36 snapshots spanning 2023–2026 across 4 tracked years.

Regulatory Verification Notes

The site's legal and policy materials support a consumer-commerce presentation, but no licensing claim or license number is disclosed. This is a limited transparency matter rather than evidence of impersonation or fraud; ordinary apparel retail generally does not imply the type of regulated authorization associated with financial services. The domain is registered through GoDaddy.com, LLC, and its technical security configuration is established.

- The policy and support pages provide consumer-facing operational information but no stated license authority or registration number.
- WHOIS records identify GoDaddy.com, LLC as registrar, with registration from 2022-11-17 through 2029-11-17.
- The site is hosted on AS13335, operated by Cloudflare, Inc.
- TLS uses issuer YE2 with DV validation and is valid through 2026-09-03.

What to Verify Next

Before a material purchase, the prospective customer should review the applicable delivery, return, refund, and payment terms and confirm that the checkout details match the order. Business contact and support channels should also be confirmed through the site’s published customer-service and policy pages.

- The homepage links shopping, support, payment, and policy functions within the same storefront.
- The site provides product-level pricing and promotional information for comparison at checkout.

Summary Verdict

Vootbuy has a high-trust posture for its stated ecommerce purpose. Its established identity, consistent retail presentation, clean external reputation, and coherent technical operation support legitimate normal use. Account login and standard purchasing activity are appropriate.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through the Cloudflare edge at 23.227.38.65; the origin server was not observable. This provides a meaningful layer of exposure mitigation, although protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Standard browsing, account use, and consumer purchasing may proceed normally, with routine review of order and fulfillment terms before higher-value transactions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vootbuy.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
