Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the public-facing service portal of ООО «УГМК-Телеком», presenting regional home and business internet, digital television, telephony, equipment sales, subscription management, and payment services for customers in Верхняя Пышма and other stated service areas.

Scam/Impersonation Risk

No contradictions were observed. The site's identity is consistent across its commercial and legal content, and the available reputation checks found no malicious, phishing, impersonation, or blacklist indicators. Its established domain registration and coherent service-provider content further support genuine business continuity rather than a disposable or deceptive operation.

EVIDENCE

- The homepage identifies ООО «УГМК-Телеком» and presents internet, digital-TV, equipment, payment, contact, and legal-service functions without detected red flags.
- The domain was registered on 2006-05-26 and is approximately 20.22 years old.
- The archive record contains 68 snapshots spanning 2025-10-13 to 2026-07-07, with 2 years tracked; this records recent archival coverage and does not replace the domain-registration history.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports.

Regulatory Verification Notes

The site provides a named operating entity, public-offer terms, privacy and personal-data policies, requisites, contacts, tariff information, and a "Licenses and Certificates" section. The supplied evidence does not confirm a specific license number or licensing authority, so the regulatory position should be treated as a verification matter rather than as evidence of misconduct. The business model is conventional for a regional telecommunications provider: the site advertises internet plans up to 1,000 Mbps, cable and interactive television packages, telephony, Wi-Fi routers and optical terminals, and balance payments redirected to a bank gateway. No adverse broker-reputation match was identified.

EVIDENCE

- The legal and footer pages identify ООО «УГМК-Телеком» and link to the public offer, privacy materials, requisites, contacts, and licenses/certificates.
- The hosting infrastructure is identified as AS51115, HLL-AS - HLL LLC, RU.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-12 09:44:46 UTC.
- The homepage's payment flow states that the customer will be redirected to a protected bank website.

What to Verify Next

For regulated procurement or material commercial exposure, the operator's applicable telecommunications authorizations should be matched to the named entity through the relevant official registry, and the licenses-and-certificates section should be checked for current document details. Before payment, the final bank-gateway destination should be confirmed as the expected institutional payment channel. Standard account and service interactions are otherwise consistent with the site's stated operating model.

EVIDENCE

- The legal-information pages provide the entity name, public-offer materials, requisites, and a licenses-and-certificates reference for registry and document validation.
- The payment function explicitly describes a bank redirection, providing a defined checkpoint for confirming the destination before authorization.

Summary Verdict

The website has a high-trust posture and is assessed as a legitimate, established service provider. The evidence supports normal interaction, including account login and standard transactions, with no observed scam, phishing, impersonation, or identity-conflict indicators.

Infrastructure Integrity

The site resolves to a single hosting address and has no detected CDN or WAF intermediary, with the infrastructure appearing to expose a direct hosting path. This is a technical architecture characteristic rather than an adverse legitimacy signal; the identified transport encryption and resolved hosting posture remain coherent with ordinary service delivery.

Closing Assessment

Normal interaction, including account login, service management, and standard payments, is appropriate; regulated or high-value engagements should follow the organization's usual independent registry and payment-control procedures.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vp.ugmk-telecom.ru.

- The request stayed on vp.ugmk-telecom.ru. It was not redirected to another domain. [CLEAR](#)
- Registration is published under REGRU-RU. [CLEAR](#)
- DNS for this domain is served by 66.7, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-05-26. [NOTED](#)
- The earliest public archive of this site is from 2025-10-13. [CLEAR](#)
- It is hosted on HLL-AS, from a server in RU. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vp.ugmk-telecom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
