

Is vtv.vn legit? TrustSniffer's high-trust assessment: 90/100

vtv.vn

Verdict

90

OUT OF 100

HIGH TRUST

vtv.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Vietnamese VTV news portal page with multiple news headlines and navigation. Contains publisher metadata, editorial contacts and licensing information; no evident financial solicitation or credential-harvesting elements.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

VTV.vn is a Vietnamese VTV news and media portal presenting political, social, legal, economic, world, health, technology, education, entertainment, television, video, podcast, and audience-engagement content; its apparent business model is that of an established public or state-affiliated publisher funded primarily through advertising, sponsored content, and institutional support.

Scam/Impersonation Risk

No scam, phishing, impersonation, or other contradictory signals were observed. The homepage presents substantive editorial content rather than financial solicitation, investment services, or credential-harvesting functionality, and the page analysis found no sensitive forms, hidden forms, wallet activity, or suspicious redirects. A lookalike-association signal was not corroborated by the site's content or behavior and is therefore not treated as evidence of brand impersonation. The available reputation checks also support a low-risk assessment.

EVIDENCE

- The homepage is identified as “Thời báo VTV - Đài Truyền hình Việt Nam” and contains extensive news, television, multimedia, and editorial navigation rather than a financial-offer or investment interface.
- Behavioral testing recorded no hidden forms, external password forms, wallet-provider activity, wallet-drainer activity, clipboard hijacking, or cloaking.
- External checks recorded 0 malicious detections and 0 suspicious detections, with no confirmed threat-list or phishing indication.

Regulatory Verification Notes

The site presents publisher metadata, editorial contacts, and licensing information consistent with a professional news operation. Its content and navigation support an apparent media-publishing purpose, while the supplied evidence does not independently verify the real-world operator identity or establish a third-party regulated financial status. A clean external reputation and a strong global traffic footprint provide affirmative support for the site's apparent establishment; a separate broker-reputation dataset produced no match, which is contextual rather than a licensing determination. The regulatory posture is therefore credible for an apparent news publisher, but any specific authorization or legal-entity claim should be confirmed independently where relevant.

EVIDENCE

- The homepage contains publisher identification, editorial contact references, and licensing-related information alongside news and broadcast content.
- The site is hosted on AS135905, VNPT-AS-VN - VIETNAM POSTS AND TELECOMMUNICATIONS GROUP, VN.
- The site's TLS certificate is issued by GlobalSign RSA OV SSL CA 2018, uses OV validation, identifies ĐÀI TRUYỀN HÌNH VIỆT NAM as the subject organization, and is valid to 2026-10-31 06:41:01 UTC.
- The domain appears in the global top one million, with a recorded traffic rank of 28168.

What to Verify Next

Before any credential or payment interaction beyond ordinary public browsing, an independent check should confirm that the publisher identity shown on the site's legal or about material corresponds to the intended real-world organization. If the site presents paid services, subscriptions, or other transactions, applicable authorization, terms, refund conditions, and payment-protection arrangements should be confirmed through authoritative external sources. Official contact channels should also be cross-checked using an independently sourced route rather than relying solely on contact details displayed on the site.

EVIDENCE

- Identity verification should use the publisher and legal information presented on the site's own pages as the comparison point.
- Any licensing or authorization confirmation should be obtained from the relevant official registry or issuing authority.
- Payment and return-policy checks become relevant only if a paid service or transaction is offered.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its apparent media-publishing function. The operator's real-world identity is not independently verified, so legitimacy should be described as evidence-consistent rather than proven.

Infrastructure Integrity

The site is protected by a CDN/WAF layer and uses infrastructure associated with VNPT-AS-VN in Vietnam. Observed edge servers and potential origin candidates indicate a functioning, professionally managed delivery architecture; the protective layer is a mitigating security signal, not proof of organizational legitimacy.

EVIDENCE

- Hosting infrastructure is resolved through AS135905, VNPT-AS-VN - VIETNAM POSTS AND TELECOMMUNICATIONS GROUP, VN, with 2 observed edge IPs and 2 potential origin candidates.
- Observed edge addresses are 14.225.10.7 and 14.225.199.134, both associated with AS135905.

Closing Assessment

Ordinary public browsing is proportionate to the assessed posture; before submitting credentials or making a payment, the prospective user should complete the independent identity, authorization, contact-channel, and payment-protection checks outlined above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vtv.vn.

- The request stayed on vtv.vn. It was not redirected to another domain. CLEAR
- It is hosted on VNPT-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vtv.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
