

Is vybetelecom.in legit? TrustSniffer's high-trust assessment: 100/100

vybetelecom.in

Verdict

100

OUT OF 100

HIGH TRUST

vybetelecom.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Vybe Telecom presents residential and enterprise connectivity services in Hyderabad and Mahabubnagar, including broadband, leased-line, managed-network, OTT, and cable-TV plans. The page provides monthly pricing, speeds, service features, an inquiry form requesting name, phone number, email address, and plan selection, plus customer-support and company-policy information.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the service portal of Vybe Telecom, a regional internet provider offering residential broadband, gated-community connectivity, enterprise internet, managed-network and leased-line services in Hyderabad and Mahabubnagar, with recurring subscriptions, optional OTT and cable-TV bundles, published plan pricing, and customer inquiry facilities.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The registration identifies VYBE TELECOM, consistent with the name used on the homepage, while the domain's established history shows no suspicious repurposing or material semantic drift. The site's inquiry and contact forms were not observed sending data to an untrusted external destination, and interactive testing found no cloaking, hidden forms, suspicious scripts, clipboard manipulation, or unauthorized wallet behavior.

- The domain registration identifies VYBE TELECOM and GoDaddy.com, LLC; it was registered in 2022 (~4.28 years old) and expires on 21 April 2030.
- The web archive contains 40 snapshots spanning 24 March 2024–21 May 2026 (3 years tracked), with historical continuity and no detected repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and no reported abuse against the observed hosting address.
- The homepage presents consistent Vybe branding and links to established social platforms, with no detected impersonation of another organization.

Regulatory Verification Notes

The site presents itself as a telecommunications service provider and supplies company-policy information, support details, plan terms, speeds, and monthly prices. The available pages do not establish a specific telecommunications licence, authorization number, or issuing authority; this is a limited regulatory-disclosure point, not evidence of deception. No matching third-party broker profile was identified, but broker-oriented reputation data is not materially relevant to the stated connectivity business.

- The homepage advertises residential plans from 50 Mbps to 400 Mbps, including unlimited usage and free-to-use routers, with displayed monthly prices from ₹500 to ₹1,299.
- The business and residential pages describe managed connectivity, enterprise access, SME and leased-line services, gated-community broadband, OTT bundles, and cable television.

- The site's transport encryption uses a DV TLS certificate issued by YR1, valid to 24 October 2026.
- The hosting telemetry identifies AS26496, operated by GoDaddy.com, LLC in the United States.

What to Verify Next

Prospective enterprise or regulated-sector customers should confirm the contracting entity's legal name, service address, tax details, service-level commitments, and complaint-escalation process in the order documentation. Where sector authorization is material to procurement, the relevant Indian telecommunications registry should be consulted for the service area and service category. Official support and payment channels should also be confirmed through independently sourced corporate documentation before establishing a commercial account.

- The homepage inquiry workflow requests a name, telephone number, email address, and selected plan, making privacy notice and lead-handling terms relevant to customer onboarding.
- The site provides company-policy and customer-support material that can be reconciled against the final service agreement.
- The advertised operating locations are Hyderabad and Mahabubnagar, providing a defined geographic scope for authorization and service-availability checks.

Summary Verdict

Vybe Telecom's website is legitimate, established, and trustworthy. Its consistent organizational identity, sustained operating history, clean threat reputation, substantive service content, stable behavior, and recognized traffic footprint converge strongly in support of normal use. No contradictory risk signals were found.

Infrastructure Integrity

The website uses a trusted CDN/WAF configuration, and the sole observed address was an edge server rather than an exposed origin candidate. This reduces direct infrastructure exposure and supports operational resilience, although protective infrastructure is not independently determinative of legitimacy.

Closing Assessment

Normal interaction—including service inquiries, account login, standard account activity, and ordinary transactions—is appropriate, subject to routine commercial due diligence for enterprise procurement.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of vybetelecom.in.

- The request stayed on vybetelecom.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2030-04-21. CLEAR
- The earliest public archive of this site is from 2024-03-24. CLEAR
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about vybetelecom.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
