Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

WalletHub is an established personal-finance platform presenting credit-card, lending, banking, insurance, budgeting, investment-monitoring, credit-monitoring, identity-protection, comparison, and financial-education services, supported by advertiser compensation for certain referrals and additional premium offerings.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious-reputation findings were observed. The homepage presents a coherent financial-information and personal-finance management model, while its disclosed referral compensation provides a credible explanation for the commercial operation; normal interaction, including account login and standard use, is appropriate.

- The homepage presents extensive, internally consistent financial tools and content, with no detected phishing or impersonation indicators.
- External reputation checks recorded zero malicious and zero suspicious detections, no blacklist match, and no abuse reports for the observed infrastructure.
- The domain was registered on 2008-04-25 and is approximately 18.28 years old.

Regulatory Verification Notes

WalletHub functions as a financial-information, comparison, and software platform rather than presenting a verified third-party regulated-entity status in the supplied evidence. The site's advertiser-compensation disclosure is material transparency regarding referrals; any regulated activity performed by products or partners should be assessed against the applicable jurisdictional requirements.

- The homepage identifies credit, lending, banking, insurance, budgeting, investment-monitoring, and identity-protection services and discloses advertiser compensation for certain referrals.
- Registration is recorded through GoDaddy.com, LLC, with the current registration extending to 2027-04-25.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid through 2027-03-29.

What to Verify Next

For any service involving a regulated financial provider, confirm the provider's authorization through the relevant official registry and review the applicable product-specific terms. Confirm official support and contact channels through the site's published legal or help pages before resolving account or payment issues.

- The homepage provides direct pathways to product comparisons, account tools, legal information, and financial education.
- The business model describes advertiser compensation for clicks, applications, or account openings, making referral disclosures relevant to product-selection decisions.

Summary Verdict

WalletHub presents as a legitimate, mature, and high-trust financial-information platform with a coherent business model and no observed indicators of scam activity or impersonation. The overall posture supports ordinary account use and standard service interaction.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge servers and no origin candidates identified. This reduces direct origin exposure and is a mitigating infrastructure control, although it is not independently proof of legitimacy.

Closing Assessment

Normal interaction is appropriate, with product-specific regulatory and provider checks retained for services that extend beyond information, comparison, or account-management functionality.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wallethub.com.

- The request stayed on wallethub.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wallethub.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
