

Is wallmadison.com legit? TrustSniffer's high-trust assessment: 100/100

wallmadison.com

Verdict

100

OUT OF 100

HIGH TRUST

wallmadison.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Wall & Madison is an established executive consulting firm offering interim C-suite leadership and advisory services across strategy, operations, M&A, and marketing. The site contains extensive advisor bios, service descriptions, and contact information. No solicitation for deposits, credentials, or crypto activity detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://wallmadison.com/>

**Since 2009, Wall & Madison
embeds senior-level expertise**

What wallmadison.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Wall & Madison is a corporate executive-consulting website presenting an “Office of the President” model, interim senior leadership, and advisory services across strategy, operations, marketing, and mergers and acquisitions for business clients.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there were no phishing, impersonation, conflicting-identity, or malicious-content findings. The homepage presents a coherent professional-services model, with detailed advisor biographies, service descriptions, and a business contact route rather than requests for deposits, cryptocurrency transfers, or sensitive credentials. A soft reputational signal is associated with the shared Amazon delivery infrastructure serving the site; the reports concern the provider IP rather than evidence tied specifically to Wall & Madison, so this does not establish site-level malicious activity.

EVIDENCE

- The homepage describes interim executive leadership and advisory work across strategy, operations, marketing, and M&A, with no deposit, crypto, or credential solicitation.
- Advisor pages provide named biographies and professional experience, including the “Office of the President” service model.
- Site behavior recorded no login form, hidden form, password submission, wallet connection, cloaking, or clipboard activity.
- The shared CDN IP 13.248.243.5 has 8 abuse reports with a confidence score of 19; attribution identifies Amazon Technologies Inc. shared infrastructure rather than the website itself.
- Domain registration: 2008-09-25; age 17.92 years; registrar GoDaddy.com, LLC.
- Web-archive records: 19 snapshots spanning 2010–2025, covering 16 years tracked.

Regulatory Verification Notes

The available content is consistent with a consulting business rather than a financial product or regulated investment service. The site does not present a license claim or registration number; this is a transparency point to resolve only if the proposed engagement involves activities requiring regulated authorization. The real-world operator identity is not independently verified, so the website should be described as apparently legitimate and evidence-consistent, not as identity-proven. The available broker-reputational dataset returned no match.

EVIDENCE

- The homepage and advisor pages identify Wall & Madison, LLC and describe corporate consulting services, but do not present a financial-services license number.
- The site's transport encryption uses a DV certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid to 2026-11-09.
- The site is served through AS16509, identified as AMAZON-02 - Amazon.com, Inc., US.
- No third-party broker match was identified.

What to Verify Next

Before a credential or payment interaction, independently confirm the contracting entity, the authority of the named representatives, the engagement terms, and the applicable payment protections. If the proposed service falls within a regulated activity, confirm authorization directly with the relevant jurisdictional registry rather than relying solely on website content.

EVIDENCE

- The advisor and service pages provide the starting points for confirming representative names and stated capabilities through an independent business channel.
- The proposed engagement documentation should establish scope, fees, termination terms, and payment arrangements before funds or credentials are exchanged.
- The absence of a license claim on the available pages makes registry confirmation appropriate where the engagement's legal classification requires it.

Summary Verdict

The overall posture is **high trust with low apparent scam or impersonation risk**. Available evidence is consistent with an established, apparently legitimate corporate website, while the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed traffic terminating at Amazon edge servers rather than an exposed origin. Two edge addresses were observed, 13.248.243.5 and 76.223.105.230, both associated with AS16509; this provides a meaningful mitigation against direct origin exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing is proportionate; before submitting credentials or making a payment, independent confirmation of the merchant identity, engagement terms, and payment protections remains appropriate.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 8 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 19% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wallmadison.com.

- The request stayed on wallmadison.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-25. NOTED
- The earliest public archive of this site is from 2010-08-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wallmadison.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
