

# Is wanfangdata.com.cn legit? TrustSniffer's high-trust assessment: 100/100

wanfangdata.com.cn

## Verdict

100

OUT OF 100

HIGH TRUST

wanfangdata.com.cn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Official WanFang academic knowledge service portal offering search, AI-enhanced retrieval, institutional binding, membership and a range of research products and services. Page contains navigation to journals, theses, patents, standards, and product pages; contact and legal/license information are present.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

No screenshot is retained for this report.

## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

WanFang Data is an established academic knowledge-service portal presenting search and AI-enhanced retrieval across journals, theses, conference papers, patents, standards, research data, and related scholarly tools, with institutional access, individual membership, research-management services, and paid academic products as its apparent business model.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent institutional academic-service model rather than a financial solicitation, cryptocurrency operation, or deceptive prize scheme. Its login and registration functions are visible, but the page-level assessment found no hidden forms, sensitive external form destinations, credential-harvesting indicators, brand-impersonation indicators, or wallet-related activity. Six inline scripts and limited non-whitelisted outbound posts were observed during technical interaction; these are low-level behavioral observations without an associated phishing, malware, or impersonation finding and do not override the broader clean reputation and long operating history.

#### EVIDENCE

- The homepage identifies the service as a WanFang academic knowledge platform and provides structured access to journals, theses, patents, standards, and research tools.
- External reputation checks recorded zero malicious and zero suspicious results, with no malicious safe-browsing finding and no external blacklist finding.
- Domain registration: 1999-01-06; age 27.62 years.
- Web-archive coverage: 3,542 snapshots spanning 1999-11-25 through 2026-07-18, across 28 tracked years.

### Regulatory Verification Notes

The site includes contact and legal or licensing-related information and presents a subscription- and institution-based academic-services model. The available evidence does not independently verify the real-world operator identity, so the site's apparent association with WanFang Data should be treated as evidence-consistent rather than proven. No specific regulatory license, licensing authority, or registration number is evidenced in the

supplied analysis; for an academic information provider this is a disclosure and applicability question, not an indication of scam activity. A separate broker-reputation dataset produced no match, which is contextual support but is not a licensing determination.

#### EVIDENCE

- The homepage provides navigation to contact, about, product, help, and legal-information areas.
- The site's transport certificate is OV-validated and issued by DigiCert Secure Site OV G2 TLS CN RSA4096 SHA256 2022 CA1, valid through 2026-09-27.
- The site is served from AS4847, CNIX-AP - China Networks Inter-Exchange, CN.
- The recorded registrar is 北京国科云计算技术有限公司（原北京中科三方网络技术有限公司）；the certificate subject organization is 北京万方数据股份有限公司.

#### What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the relevant WanFang Data corporate identity, subscription terms, cancellation and refund arrangements, and payment-protection provisions correspond to the intended service. Where an institutional procurement or regulated-use requirement applies, the applicable business registration or sector authorization should be checked through the relevant official registry rather than inferred from the website presentation. Official support and contact channels should also be confirmed through an independent, established route.

#### EVIDENCE

- The homepage exposes login, registration, institutional binding, membership, and paid research-service functions.
- The site provides links to about, products, help, and contact-related areas for identity and service-term review.
- The page content describes institutional subscriptions, individual membership, and paid research tools rather than anonymous or ad hoc financial solicitation.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated academic knowledge-service purpose. No scam, phishing, impersonation, or other contradictory signal was identified, although independent operator identity verification remains incomplete.

#### Infrastructure Integrity

The site does not use a detected CDN or WAF layer; five resolved addresses were assessed as likely origin addresses, with no edge addresses identified. This provides less intermediary shielding than a CDN-fronted deployment, but it is an infrastructure characteristic rather than evidence of maliciousness.

#### Closing Assessment

Normal research use is proportionate to the assessed posture, while ordinary independent checks of merchant identity, service terms, and payment protections should precede credential submission or paid transactions.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 55/100     |
| Identity verification confidence | 60%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of wanfangdata.com.cn.

- The request stayed on wanfangdata.com.cn. It was not redirected to another domain. CLEAR
- Registration is published under 北京国科云计算技术有限公司（原北京中科三方网络技术有限公司）. CLEAR
- DNS for this domain is served by sfndns.cn, across 4 name servers. NOTED
- The registration is paid up to 2031-01-06. CLEAR
- The earliest public archive of this site is from 1999-11-25. CLEAR
- It is hosted on CNIX-AP, from a server in CN. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about wanfangdata.com.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
