

Is wasabiwallet.eu legit? TrustSniffer's high-trust assessment: 100/100

wasabiwallet.eu

Verdict

100

OUT OF 100

HIGH TRUST

wasabiwallet.eu appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Official-looking product landing page for Wasabi Wallet: an open-source, privacy-focused Bitcoin wallet offering self-custody, Tor-based networking, CoinJoin (WabiSabi) support, and hardware wallet integration. The site links to community resources like GitHub and discussions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://wasabiwallet.eu/>

What wasabiwallet.eu served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is the official-looking product landing page for Wasabi Wallet, an open-source, privacy-focused Bitcoin wallet that presents self-custody, Tor-based networking, CoinJoin support, private blockchain synchronization, and hardware-wallet integration for users seeking software rather than managed investment services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no blacklist, phishing, impersonation, malicious-content, or conflicting-identity finding. The homepage's presentation is consistent with a software project, including free and open-source distribution, self-custody messaging, GitHub links, and community resources rather than a request for deposits or promised returns. Some privacy language is strongly promotional—for example, the site describes activity as “virtually impossible” to trace—but this is a product claim, not evidence of impersonation. A separate reputational signal concerns abuse reports associated with a shared CDN address operated by Internet Utilities Europe and Asia Limited; the attribution is to shared infrastructure, so it does not establish that the website itself generated the reported activity.

EVIDENCE

- The homepage describes Wasabi Wallet as “Free & Open Source,” self-custodial, and privacy-focused, with no sensitive form or login form detected.
- The homepage identifies Tor integration, Compact Filters, WabiSabi multi-party transactions, and hardware-wallet support as product functions.
- Domain evidence records registration continuity of 3.49 years (1,273 days); historical observation begins on 2023-02-25.
- Historical records contain 109 archive snapshots, with first seen 2023-02-25 and last seen 2024-09-26, across 2 years tracked.

Regulatory Verification Notes

The site’s apparent activity is software distribution and community support, not an investment solicitation or managed-return service. The available page evidence does not show a license claim, license number, or clearly stated legal-entity disclosure; this is a transparency and regulatory-verification gap rather than a scam indicator. Independent operator identity remains unverified. The absence of a broker-dataset match provides contextual support but is not a licensing or regulatory determination.

EVIDENCE

- The homepage and product navigation identify the service as a Bitcoin wallet and provide Download, Docs, Documentation, and Legal sections.
- The available legal and identity-page evidence does not establish a verified real-world operator or disclose a license number.
- The domain registrar is IMMATERIALISM LIMITED.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc.); its TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-23.

What to Verify Next

Before credential or payment interactions, an independent review should confirm the operator associated with the legal materials, determine whether any jurisdiction-specific registration or licensing obligation applies to the software activity, and check the applicable user terms and payment protections. Software should be obtained through the site’s official Download path and compared with the project’s independently maintained public code and community references.

EVIDENCE

- The homepage provides a Download path and links to Docs and Documentation for comparison with the stated software functionality.
- The site exposes a Legal section that can be reviewed for operator, jurisdiction, and user-term details.
- Public project references include GitHub, Slack, and discussions hosted on the Wasabi Wallet community domain.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The classification is strong, while the real-world operator connection remains independently unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with the observed address belonging to AS13335 and no origin candidate exposed in the supplied analysis. This is a meaningful exposure-mitigation measure, but protective hosting alone is not proof of legitimacy.

Closing Assessment

Normal browsing and ordinary software-project interaction are proportionate to the assessed posture; independent merchant-identity, terms, and payment-protection checks should nevertheless precede any credential or payment action.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 50 reports on hosting IP 185.158.133.1 (Internet Utilities Europe and Asia Limited, Content Delivery Network), 45% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wasabiwallet.eu.

- The request stayed on wasabiwallet.eu. It was not redirected to another domain. CLEAR
- Registration is published under IMMATERIALISM LIMITED. CLEAR
- DNS for this domain is served by eu for more info.. NOTED
- The earliest public archive of this site is from 2023-02-25. CLEAR
- It is hosted on CLOUDFLARENET, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wasabiwallet.eu at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
