The page as captured

https://wealth-growth.com/

What wealth-growth.com served when TrustSniffer captured it on 2026-10-01. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Wealth Growth is an informational personal-finance website presenting more than 15 free, browser-based calculators and plain-English guides for budgeting, take-home pay, mortgages, debt repayment, retirement, investing basics, savings, and taxes. Its apparent business model is to provide educational tools without registration or direct payment, with monetization through disclosed affiliate referrals and advertising.

Scam/Impersonation Risk

No contradictions were observed: the available evidence does not indicate phishing, brand impersonation, conflicting legal identities, or a confirmed blacklist listing. The homepage presents a coherent informational purpose, contains no login or sensitive-payment form, and offers calculations without requiring sign-up. One isolated external scan classified the domain as malicious, but that result was not corroborated by the other available reputation checks, which recorded no malicious finding from the major web-safety check, no abuse reports, no blacklist match, and no broker-dataset match; it is therefore a limited reputational signal rather than evidence of confirmed abuse.

EVIDENCE

- Homepage: states that the calculators are free, require no sign-up, and provide immediate browser-based results.
- Homepage interaction analysis: detected no login form, hidden form, password submission, wallet connection, clipboard interception, or suspicious inline script.
- External reputation checks: recorded one malicious classification in an otherwise non-convergent result set, with no blacklist match, no abuse reports, and no major web-safety malicious finding.
- Archive provenance: 43 snapshots spanning 2004–2025, covering 22 tracked years.

Regulatory Verification Notes

The site appears to operate as an informational financial-tools publisher rather than a deposit-taking, investment-management, or payment service. The sampled material contains an affiliate disclosure and does not claim a financial-services license or provide a registration number; this is a regulatory-transparency point to verify if the site's role expands beyond general education or referral activity. The real-world operator remains independently unverified, so the site's apparent legitimacy should not be treated as proof of a particular company or person. The domain uses a privacy service through Withheld for Privacy LLC, which is an administrative registration detail rather than an identity contradiction. The registration record identifies Namecheap, Inc. as registrar, while the site's valid transport certificate was issued by WE1.

EVIDENCE

- Homepage: describes free calculators and money guides, with affiliate disclosure and no direct payment or deposit flow on the sampled page.
- Registration record: registered 2021-10-05 and approximately 4.99 years old; registrar is Namecheap, Inc.
- Transport security: TLS certificate issued by WE1 with DV validation, valid to 2026-11-07.
- Archive record: first seen 2004-03-21 and last seen 2025-07-14, with no detected suspicious repurposing or semantic drift.

What to Verify Next

Before credential or payment interactions, independently confirm the legal identity behind the website, review the applicable terms and privacy disclosures, and assess whether any referral partner is clearly identified. If a regulated product, paid service, or financial recommendation is introduced, confirm the relevant provider's authorization in the applicable official registry and use payment methods with established dispute protection. Contact details should be validated through an independently sourced official channel rather than relying solely on information presented on the site.

EVIDENCE

- Homepage: presents educational calculators and guides rather than a direct account, deposit, or payment workflow.
- Site navigation: includes About, Resources, Guides, and Compare areas that can be reviewed for operator, affiliate, and disclosure information.
- Business model description: identifies referral or affiliate links and display advertising as the apparent monetization mechanisms.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate informational website. Its content, observed behavior, and external checks do not present a convergent scam or impersonation pattern, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The website is served through Cloudflare's CDN and WAF, with observed addresses belonging to Cloudflare edge infrastructure and no origin server address identified in the analysis. This provides a meaningful layer of exposure reduction and traffic protection, but it is a mitigating infrastructure characteristic rather than proof of site ownership or legitimacy.

EVIDENCE

- Hosting: served from AS13335, CLOUDFLARENET—Cloudflare, Inc., US.
- Observed edge addresses: 104.21.27.229, 172.67.169.205, 2606:4700:3032::6815:1be5, and 2606:4700:3034::ac43:a9cd, all associated with AS13335.
- Infrastructure posture: Cloudflare CDN/WAF detected; 4 edge IPs observed and 0 likely origin IPs identified.

Closing Assessment

Ordinary browsing and use of the educational tools is proportionate to the assessed posture; before submitting credentials or making any payment, complete the independent identity, terms, and payment-protection checks described above.

Written analysis generated 2026-10-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

4 findings contributed to this verdict, raised by governance, registration and ownership, behaviour in a sandbox, page content.

01 Governance

- What the site offers, as described on its own pages, limits how high the score can go until more of it can be verified.

Governance rule:gov_business_model_cap

02 Registration and ownership

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

03 Behaviour in a sandbox

- The page made many background requests to other domains while it was open.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_XHR_HEAVY

04 Page content

- The page carries none of the structured previews for search and social sharing that established sites usually provide.

Page content rule:PAGE_SEO_NO_STRUCTURED

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
----------------	--------

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wealth-growth.com.

- The request stayed on wealth-growth.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NAMECHEAP INC. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2026-10-05. [NOTED](#)
- The earliest public archive of this site is from 2004-03-21. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wealth-growth.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
