Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Chilean school-management SaaS platform presenting AI-assisted curriculum tools, pedagogical administration, family communication, student and teacher applications, school-convivencia functions, analytics, training, demonstrations, and enterprise deployment information. Its apparent business model is licensed software subscriptions and paid implementation or support services for schools and educational institutions.

Scam/Impersonation Risk

No contradictory phishing, impersonation, malicious-reputation, or brand-conflict signals were observed. The homepage presents a coherent education-software proposition, including curriculum AI for Chilean schools, school-management modules, and related mobile applications. Behavioral testing observed hidden forms on the homepage across both test runs, but no password-external submission, suspicious script, wallet activity, cloaking, or sensitive login form was identified; this is therefore a review point rather than evidence of impersonation or fraud. The apparent website identity is consistent with an established service, although the real-world operator connection remains independently unverified.

EVIDENCE

- The domain was registered in 2015 and is approximately 11.45 years old; the recorded registrant is ROWSIS LIMITADA.
- The site has 103 archive snapshots spanning 2021-07-27 through 2026-07-27, covering 6 years, with no detected suspicious repurposing or semantic drift.
- The homepage returned successfully during 2 of 2 behavioral runs; 2 hidden forms were detected across those runs, with 0 external password forms and 0 wallet-drainer runs.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports for the assessed host.

Regulatory Verification Notes

The available content is consistent with a commercial education-technology provider rather than a financial or otherwise regulated service. The site describes demonstrations, subscriptions, support, and enterprise deployment, but the reviewed marketing content does not state a regulatory license or license number. That is a disclosure and applicability point for procurement review, not evidence of a scam. The recorded domain registration through NIC Chile and the named registrant provide administrative context, but they do not

independently prove that the website operator, contracting entity, or service provider is the same real-world organization. Transport security is present through a valid domain-validated certificate issued by Go Daddy Secure Certificate Authority - G2.

EVIDENCE

- The site's domain registration lists NIC Chile as registrar, with creation date 2015-03-02T17:57:13Z and expiration date 2027-03-02T17:57:13Z.
- The site's transport encryption uses a DV TLS certificate issued by Go Daddy Secure Certificate Authority - G2, valid through 2026-10-03T01:15:06+00:00.
- The homepage provides contact and demonstration-request pathways and identifies the service as a school-management platform for Chilean educational institutions.
- No license number or regulated-status disclosure is presented in the reviewed marketing content.

What to Verify Next

Before credential or payment interactions, the prospective customer should independently confirm the contracting entity behind the service, obtain the applicable service and data-processing terms, and review cancellation, refund, support, and payment-protection provisions. Where the school's procurement framework requires a license, registration, or education-sector authorization, that status should be confirmed with the relevant official registry or contracting authority. Contact details used for onboarding or support should also be validated through an independent route rather than relying solely on the website.

EVIDENCE

- The homepage offers a demo request and contact workflow suitable for obtaining the contracting entity and service documentation.
- The site presents separate access pathways for families, students, and teachers, making confirmation of the correct official access route appropriate before account use.
- The stated institutional deployment model supports obtaining written commercial, support, privacy, and data-handling terms before purchase.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate education-software website. The principal residual uncertainty concerns independent confirmation of the real-world operator, not an observed scam or impersonation contradiction.

Infrastructure Integrity

The site is hosted on Google Cloud Platform, Google LLC, through AS396982, with one resolved address identified as a likely origin and no CDN detected. Google Cloud provides a mainstream hosting environment and the infrastructure presents no observed fast-flux, cloaking, or abusive-traffic behavior; these are mitigating technical signals, not proof of operator legitimacy.

Closing Assessment

Normal evaluation may proceed, with ordinary independent checks of the contracting entity, commercial terms, and payment protections completed before credentials or payments are exchanged.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of web.appoderado.cl.

- The request stayed on web.appoderado.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by googledomains.com, across 4 name servers. NOTED
- The registration is paid up to 2027-03-02. NOTED
- The earliest public archive of this site is from 2021-07-27. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about web.appoderado.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
