

Is webamooz.com legit? TrustSniffer's high-trust assessment: 90/100

webamooz.com

Verdict

90

OUT OF 100

HIGH TRUST

webamooz.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 75%.

What this site appears to be

Persian-language investigative news site focused on cybercrime, scams, and fraud. Contains articles, reports and multimedia about cryptocurrency scams, Ponzi schemes, phishing, malware, and illegal gambling. Appears to be an independent journalism outlet.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Persian-language investigative journalism and cybercrime-reporting outlet that publishes articles, reports, and multimedia concerning scams, Ponzi schemes, cryptocurrency fraud, phishing, malware, illegal gambling, and related security issues. Its stated purpose is public-interest investigation and documentation rather than selling financial products or operating an online trading service.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting legal-entity signals were observed. The homepage and article sections consistently present Webamooz as an independent investigative publication, with reporting on subjects such as the TNT, FRZSS, and LIAM token cases, online fraud, and cybercrime. The contact page provides a contact form and an email address, while the site does not present a login, checkout, wallet-connection, or other sensitive transaction workflow. The available evidence is therefore consistent with an established media website, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Webamooz as an independent cybercrime and computer-fraud investigation outlet and contains reporting on alleged token and fraud schemes.
- The About page describes the outlet as established in 2016 by Mohammad Jorjandi for investigating and documenting cybercrime.
- The domain was registered on 2007-05-06 through IONOS SE and is approximately 19.3 years old.
- The site's historical record contains 508 snapshots from 2015-10-25 through 2026-07-10, covering 12 tracked years.

Regulatory Verification Notes

The About and Contact pages provide a stated organizational name, an editorial purpose, a named founder, a postal address, and contact mechanisms. The About page states that the publication is independent and unaffiliated with an institution, organization, or political body. No media, corporate, or other regulatory license is claimed in the supplied site content; for an investigative publication this is a transparency and applicability question rather than evidence of fraud. The site's policy-page mapping is not fully clear because privacy and terms references point to an illegal-gambling category page. Independently, the supplied protocol-recognition record identifies webamooz.com as a recognized DeFiLlama protocol, but it provides no protocol category or TVL, market-cap, or trading-volume figure; that recognition is a positive provenance signal, not a licensing determination.

EVIDENCE

- The Contact page identifies "Webamooz.Com" and provides a postal address and contact form.
- The About page states that the outlet operates independently and within the laws of the United States and the Islamic Republic of Iran.
- The site is served on AS13335 by CLOUDFLARENET — Cloudflare, Inc., US; its TLS certificate is issued by WE1 at DV validation level and is valid to 2026-11-14T11:42:12+00:00.
- The supplied independent recognition record names webamooz.com; no category or financial magnitude is included in that record.

What to Verify Next

Before credential or payment interactions connected with any future service associated with the domain, an independent check should confirm the responsible legal or editorial entity, the applicability of any media or business registration requirements, and the authenticity of the published contact channels. Any commercial solicitation, donation request, sponsorship arrangement, or financial product reference should be assessed separately from the site's journalism function, with payment protection and contractual terms confirmed through independent records.

EVIDENCE

- The About page is the primary source for the outlet’s stated founder, purpose, and independence claims.
- The Contact page is the primary source for the published identity and communication details.
- The site’s observed forms are contact and search functions; no checkout or sensitive login workflow was identified.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate investigative website and supports a high-trust, low-risk posture with no observed scam or impersonation contradictions. The supplied independent record also explicitly recognizes webamooz.com as a DeFiLlama protocol; because no category or TVL/market-cap magnitude is supplied, that aspect should not be interpreted more broadly than the recognition itself. Operator identity is likely but not independently verified.

Infrastructure Integrity

The site is protected by Cloudflare CDN and WAF services, with observed addresses belonging to Cloudflare edge infrastructure rather than a directly exposed origin. This protective arrangement reduces direct exposure of the hosting environment and is a mitigating technical signal, but it does not independently establish the operator’s identity.

EVIDENCE

- Cloudflare edge addresses observed: 104.26.2.21, 104.26.3.21, 172.67.68.37, and 2606:4700:20::681a:215.
- All observed edge addresses resolve through AS13335; no origin candidate was identified in the infrastructure observation.

Closing Assessment

The site is suitable for ordinary informational use, while independent identity, applicability of any registration requirements, and payment-protection checks should precede credential submission or any financial interaction.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2
- org:Webamooz
- contact:email

- contact:form
- on_site_identity

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of webamooz.com.

- The request stayed on webamooz.com. It was not redirected to another domain. CLEAR
- Registration is published under IONOS SE. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-06. NOTED
- The earliest public archive of this site is from 2015-10-25. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about webamooz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
