

Is weblogica.mx legit? TrustSniffer's high-trust assessment: 100/100

weblogica.mx

Verdict

100

OUT OF 100

HIGH TRUST

weblogica.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Spanish-language corporate website for Web Lógica, a Mérida-based agency offering ecommerce development, web design, digital marketing, and hosting. It presents experience metrics, client case studies, supported commerce platforms, articles, quotation and contact options, a local address, and a telephone number.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Spanish-language corporate presence of Web Lógica, a Mérida-based digital agency that markets ecommerce development, website design, digital marketing, and web-hosting services to businesses, supported by portfolio material, case studies, resources, and channels for requesting quotations or making contact.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or other fraud signals were observed. The homepage presents a coherent commercial identity and supports its experience claims with named client cases, including Galletas Dondé USA and Grupo Promotora Residencial. Its promotional counters—more than 20 years in the sector, 270 campaigns, more than 1,300 clients, more than 3,000 websites, and a team of more than 10 specialists—are self-published marketing claims rather than independently substantiated metrics, but they are consistent with the site's long provenance. The contact, quotation, and newsletter forms did not request passwords, use hidden fields, or submit to untrusted destinations.

- The homepage identifies Web Lógica as a Mérida digital agency and presents named portfolio cases rather than imitating another brand.
- The observed forms comprised three ordinary business workflows: contact, quotation request, and newsletter subscription; no sensitive or hidden form was detected.
- The domain was registered in 2010 and is approximately 16 years old; the recorded registrant is Mi Panel Host and the registrar is Internet para tu negocio SCP.
- The web archive contains 161 snapshots from 2009 to 2025, spanning 17 tracked years, with no established suspicious repurposing or semantic drift.

Regulatory Verification Notes

The site presents a conventional corporate-services model rather than a regulated financial, investment, payment, or crypto offering. No regulatory licence is claimed, and none appears necessary for the described agency services. A privacy notice, physical office address, and telephone number provide identifiable business and contact context. Minor disclosure-quality limitations consist of placeholder-style privacy wording and comparatively light metadata, which affect presentation quality but do not undermine the site's established identity. No matching broker record was identified; this is neutral because the business does not present itself as a broker.

- The privacy material supplies a privacy notice, although parts were assessed as placeholder-style text.

- The agency and contact content publishes a local office address and telephone number.
- The homepage describes only corporate digital services and contains no financial, brokerage, crypto, or investment proposition.
- External reputation checks recorded zero malicious and zero suspicious detections, no malicious safe-browsing finding, no abuse reports, and inclusion within the top one million domains at traffic rank 579,305.

What to Verify Next

Prospective commercial clients should confirm the legal contracting name, tax details, service scope, intellectual-property ownership, hosting responsibilities, support commitments, and data-processing terms in the written proposal. References for relevant portfolio projects should be validated when procurement value or operational dependency is material, and official contact channels should be confirmed through independently sourced business records before authorising payments or transferring production credentials.

- The homepage directs prospective clients toward contact and project-quotation workflows, making the resulting proposal the appropriate source for contractual particulars.
- The portfolio section presents recent work and named cases that can support reference checks during supplier due diligence.
- The site markets both development and hosting, creating a procurement need to allocate operational, security, backup, and support responsibilities clearly.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate presence. Its durable provenance, coherent commercial identity, substantive portfolio content, clean threat reputation, and benign observed behavior converge strongly in support of normal business engagement.

Infrastructure Integrity

The site uses Cloudflare CDN/WAF protection, with the observed address operating as an edge endpoint and no origin candidate exposed during the assessment. This architecture reduces direct origin exposure and provides a meaningful security mitigation, although infrastructure protection is not itself proof of business legitimacy.

- The hosting infrastructure was observed on AS32475, attributed to SINGLEHOP-LLC / Internap Holding LLC in the United States, at edge address 96.127.149.2.
- The site's transport encryption uses a valid DV TLS certificate issued by YR1, valid until 9 October 2026.
- All observed addresses were classified as Cloudflare edge infrastructure; one unique edge address and no likely origin address were identified.

Closing Assessment

Normal interaction, including use of the site's standard forms and ordinary commercial engagement, is appropriate, subject to routine supplier due diligence and contractual controls proportionate to the value and sensitivity of the proposed work.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of weblogica.mx.

- The request stayed on weblogica.mx. It was not redirected to another domain. CLEAR
- Registration is published under Internet para tu negocio SCP. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-10. NOTED
- The earliest public archive of this site is from 2009-10-26. CLEAR
- It is hosted on SINGLEHOP-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about weblogica.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
