Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

WebPress is a Brazilian digital agency presenting custom and ready-made websites, landing pages, virtual stores, online radio solutions, hosting, internet support, portfolio work, and ordinary business contact channels for prospective customers.

Scam/Impersonation Risk

No contradictions were observed across the reviewed pages and technical signals. The homepage describes conventional web-development services rather than financial returns, deposits, or credential harvesting; it contains no login form, hidden sensitive form, wallet interaction, or brand-impersonation indicator. External reputation checks found no malicious or suspicious detections, and the site's observed behavior showed no unauthorized external activity.

- Homepage: WebPress identifies itself as a digital agency offering websites, landing pages, hosting, online radio, and support.
- Contact page elements: The site provides a contact form, telephone, WhatsApp, email, and social-media references without a sensitive-data form.
- Site behavior: Two successful runs showed no wallet activity, hidden forms, clipboard manipulation, cloaking, or suspicious scripts.
- Domain history: Registered 2017-07-18 and approximately 9.05 years old; 66 archive snapshots spanning 2017–2026, covering 10 tracked years.

Regulatory Verification Notes

The site presents an ordinary commercial-services model and does not claim to provide regulated financial or investment services. No regulated license claim or license number appears in the reviewed content; this is a transparency item for confirming the applicable commercial registration, not an identity contradiction. The available business presentation, portfolio, and contact structure are consistent with a legitimate digital agency, while the low authority signal is contextual only and does not alter the trust assessment.

- About and Services content: The business is described as a digital communications agency serving customers throughout Brazil.
- Portfolio and Contact pages: The site presents completed projects and multiple customer-contact channels.
- Hosting telemetry: Served from AS40021 (Contabo Inc., US).
- TLS telemetry: Certificate issued by YR2 at DV validation level, valid through 2026-09-09.

What to Verify Next

Before a commercial engagement, the counterparty’s legal name, invoicing details, contractual scope, and applicable Brazilian business registration should be matched against independent records. Payment instructions and official contact channels should also be confirmed through an independently sourced route before material funds are transferred.

- About page: Supplies the agency description and geographic service coverage for identity matching.
- Services and Portfolio pages: Provide the stated service scope and examples against which a proposal can be compared.
- Contact page: Provides the channels requiring independent confirmation before contracting.

Summary Verdict

The website has an established, legitimate, and trustworthy posture with no observed scam, phishing, impersonation, or malicious-behavior indicators. Its content, historical continuity, ordinary commercial model, and stable technical operation converge on a low-risk business-services presence suitable for normal interaction.

Infrastructure Integrity

The site resolves directly to a Contabo-hosted origin rather than a CDN or WAF edge. This is a neutral infrastructure characteristic; the identified hosting environment and valid TLS provide baseline transport and hosting integrity but are mitigating signals, not proof of legitimacy.

Closing Assessment

Normal browsing, account login where applicable, and standard business engagement are appropriate, subject to ordinary commercial due diligence for any proposed contract or payment.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of webpress.net.br.

- The request stayed on webpress.net.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 238.158, across 2 name servers. NOTED

- The registration is paid up to 2027-07-18. NOTED
- The earliest public archive of this site is from 2017-09-13. CLEAR
- It is hosted on CONTABO-40021, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about webpress.net.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
