Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Vietnamese sports-media portal that publishes frequently updated reporting and community content across football, basketball, volleyball, esports, fitness, combat sports, and other disciplines, with an apparent commercial model based on advertising, media partnerships, and an associated sports shop.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The long-established domain and dense, continuous historical record align with the current sports-media function, with no evidence of suspicious repurposing. External threat-intelligence coverage was clean, and the homepage presented substantive editorial material with named authors rather than imitation branding or deceptive financial propositions.

- The domain is approximately 18.09 years old; its archive contains 617 snapshots from 27 June 2008 to 5 July 2026, spanning 19 tracked years.
- The homepage contained 11,879 characters of editorial text and showed no sensitive, hidden, or externally directed form.
- Reputation telemetry recorded zero malicious and zero suspicious detections, no malicious safe-browsing result, no abuse reports, and no signature matches.
- The domain held a global traffic rank of 256,905, placing it within the top one million observed sites.

Regulatory Verification Notes

The site presents the governance disclosures expected of an established media publisher: its footer identifies the operating company, publication licence, responsible editor, physical offices, telephone contacts, privacy policy, and advertising channels. These disclosures support accountable editorial operations, and no competing legal-entity identity was found. The supplied evidence does not independently establish the legal standing of the displayed publication licence; this is a validation boundary, not an adverse signal or evidence of misrepresentation.

- The homepage footer provides corporate ownership, publishing-licence, editorial-responsibility, office, telephone, privacy, and commercial-contact information.
- The site's transport encryption uses a DV certificate issued by Sectigo RSA Domain Validation Secure Server CA, valid until 29 September 2026.

- The observed service endpoint was hosted on AS54994, operated by ML-1432-54994 – Meteverse Limited., CA.
- The assessed homepage was classified as sports news/media and contained no cryptocurrency, investment, brokerage, or financial-product offering.

What to Verify Next

For institutional onboarding, the displayed company and publication-licence particulars should be matched against the relevant Vietnamese publisher or media registry. Advertising, partnership, or shop-related engagements should use the corporate channels shown in the site's legal and commercial disclosures, with contracting and payment details independently confirmed. Routine review should also ensure that account, privacy, and commerce terms remain consistent across linked service areas.

- The homepage includes user registration and login navigation, although no credential-entry form was present on the assessed page.
- A separately identified sports-shop entry indicates that commercial transactions may extend beyond the core editorial experience.
- The site provides dedicated privacy and advertising references suitable for institutional due diligence and contracting checks.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence between its editorial substance, accountable publisher identity, historical continuity, traffic footprint, and clean external reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the single observed address was a CDN edge endpoint rather than a confirmed origin server. This arrangement reduces direct origin exposure and provides a conventional protective layer, although infrastructure protection is a security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the website normally, including standard account functions, while applying routine password, payment, and counterparty controls appropriate to any online media service.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of webthethao.vn.

- The request stayed on webthethao.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2008-06-27. CLEAR
- It is hosted on ML-1432-54994, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about webthethao.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
