

Is webtickets.co.za legit? TrustSniffer's high-trust assessment: 90/100

webtickets.co.za

Verdict

90

OUT OF 100

HIGH TRUST

webtickets.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Webtickets event listing and ticket purchase site for South Africa and partner countries. Shows featured events, categories, support contact, and seller/promoter tools. Standard e-commerce flows (cart, checkout, sign-in) are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Webtickets is an online event-ticketing marketplace serving South Africa and partner countries, presenting event listings, tickets, vouchers, deals, support functions, and promoter tools through a conventional e-commerce model involving cart, checkout, sign-in, payment collection, and electronic ticket delivery.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent ticketing and event-marketplace proposition, with event categories, featured performers, voucher and deal sections, promoter functionality, and ordinary sign-in and checkout flows rather than high-risk financial or credential-harvesting mechanics. The available reputation checks found no malicious or suspicious classification, no phishing or impersonation indicator, and no confirmed blacklist result. The long-running domain and continuous historical presence further support provenance consistent with an established service.

EVIDENCE

- The homepage identifies “Webtickets Online Tickets” and displays featured events, event categories, vouchers, deals, and promoter tools.
- The page-content assessment recorded zero red flags and a low page-risk classification; the observed login and checkout forms had no untrusted destination or hidden-form finding.
- The domain was registered on 2007-07-21 and is approximately 19.07 years old.
- Historical records contain 435 snapshots spanning 2007-12-13 to 2019-10-21, covering 13 tracked years.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate ticketing business, but the real-world operator identity is not independently verified. The site’s commercial activity involves ticket sales, vouchers, booking or service fees, and promoter fees; no licensing claim or registration number was identified in the supplied site evidence, which is a transparency item to clarify according to the applicable jurisdiction and business obligations. The domain is registered through ECOTECH Converge, and the site has substantive event, support, FAQ, and transaction content. External reputation signals are clean, while page-authority evidence is mid-range and explanatory only; neither establishes legal status or operator identity.

EVIDENCE

- The domain registrar is ECOTECH Converge; the recorded registrant organization is “#Complete Customer Name”.
- The site is served from AS8075, MICROSOFT-CORP-MSN-AS-BLOCK — Microsoft Corporation, US.
- The transport certificate is issued by Sectigo RSA Domain Validation Secure Server CA, uses DV validation, and is valid through 2026-10-29 23:59:59 UTC.
- The homepage metadata states that Webtickets has been “The leader in online ticket sales in South Africa since 2007.”

What to Verify Next

Before credential or payment interactions, an independent check should connect the Webtickets service to the intended merchant or event promoter through an official offline or separately sourced channel. The applicable terms, cancellation and refund conditions, booking fees, ticket-delivery obligations, and payment-dispute protections should be reviewed at the point of purchase. Where the transaction or event category is subject to licensing or registration requirements, the relevant registry should be checked using the legal entity and operator details obtained independently.

EVIDENCE

- Checkout: confirm the displayed merchant name, total charges, refund terms, and available payment-protection mechanisms before authorizing payment.
- Event listing: independently confirm the event, venue, promoter, and ticket allocation with the venue or promoter.
- Account and support functions: confirm that contact and recovery channels correspond with independently sourced official details.
- Legal or terms materials: record the responsible entity and any applicable registration or licensing information before a material transaction.

Summary Verdict

The overall posture is **high trust and low risk**, with the evidence converging on an established, apparently legitimate website rather than a scam or impersonation operation. The principal qualification is that the available evidence does not independently verify the real-world operator identity, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with the observed edge address associated with Microsoft Corporation and AS8075; the origin server was not observable in this analysis. This is a mitigating technical control that reduces direct origin exposure, but it is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing and ordinary ticketing activity are proportionate to the assessed posture, while independent merchant, event, refund, and payment-protection checks should be completed before submitting credentials or authorizing a significant payment.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of webtickets.co.za.

- The request stayed on webtickets.co.za. It was not redirected to another domain. CLEAR
- Registration is published under ECOTECH Converge. CLEAR
- DNS for this domain is served by co.za, across 4 name servers. NOTED
- The registration is paid up to 2027-07-21. NOTED
- The earliest public archive of this site is from 2007-12-13. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about webtickets.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
