

Is webway.host legit? TrustSniffer's high-trust assessment: 90/100

webway.host

Verdict

90

OUT OF 100

HIGH TRUST

webway.host appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Commercial hosting provider site offering various hosting products, pricing, and account management (login/register). Marketing copy, reviews, and feature lists present; typical SaaS/subscription model.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Webway.host presents itself as a commercial hosting and technology-services provider offering website hosting, reseller hosting, VPS hosting, domain registration, backups, S3-compatible storage, website design, and related account-management services through a recurring subscription model.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or conflicting legal-identity indicators were observed. The homepage presents a coherent hosting-provider business model with product categories, pricing, account registration, customer reviews, and referral offerings; the available content was assessed as promotional rather than deceptive. One external reputation service recorded a single unconfirmed suspicious observation, while broader threat detections did not identify malicious activity; this is a soft reputational signal, not a confirmed blacklist or scam finding. The domain's observed history shows continuity rather than suspicious repurposing, although the public brand is not independently connected to a verified real-world operator.

EVIDENCE

- The homepage presents website, reseller, VPS, domain, backup, S3-storage, and design services with subscription pricing and no detected phishing or impersonation markers.
- Domain registration: 2024-12-04; age 1.68 years; registrar: NameSilo, LLC.
- Web-archive coverage: 14 snapshots spanning 2025-02-11 to 2026-06-30, across 2 years tracked, with historical continuity score 1.
- External reputation results recorded 0 malicious detections and 1 suspicious detection; no blacklist hit was recorded.

Regulatory Verification Notes

The site operates as a commercial hosting and SaaS provider rather than presenting itself as a regulated financial service. Its public materials describe subscription services and display commercial claims, including a 4.7/5 rating from 1,248 Google reviews, pricing from €2.50 per month for website hosting, and a 15% monthly referral reward. No licensing regime or registration number is identified in the supplied site content; this is a transparency item for ordinary merchant verification, not evidence of impersonation or fraud. The public brand is apparent, but the operator's real-world identity remains independently unverified. The registration privacy record is an administrative detail rather than an identity contradiction.

EVIDENCE

- The homepage identifies the business as “Webway” and contains login, registration, contact, product, pricing, and promotional sections.
- The site's transport encryption uses a DV certificate issued by YE1, valid until 2026-09-21 17:28:17 UTC.
- The hosting infrastructure is served from AS328882, Sahdsoft Technologies CC - Sahdsoft Technologies CC, ZA.
- The domain registration record lists NameSilo, LLC as registrar and expires on 2026-12-04 23:59:59 UTC.

What to Verify Next

Before a credential or payment interaction, the prospective customer should independently confirm the legal trading entity, applicable service terms, cancellation and refund provisions, and the payment-protection arrangements offered for recurring subscriptions. Licensing confirmation should be performed only if a specific regulated service is later advertised; the current materials describe hosting services rather than a regulated financial product. Official support and contact channels should be confirmed through an independently sourced route, and any account credentials should be unique to this service.

EVIDENCE

- The homepage exposes login and registration forms alongside commercial subscription plans.
- The supplied page analysis identifies three forms: login, registration, and contact/lead.
- The business model is described as recurring revenue from hosting, domain, backup, storage, and related professional services.
- No regulated third-party broker match was recorded.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The principal qualification is that the real-world operator has not been independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site is hosted directly on Sahdsoft Technologies CC infrastructure in South Africa, using AS328882, with no detected CDN or WAF layer and one likely origin address. Valid TLS provides transport protection, while the absence of an identified edge-protection layer means infrastructure should be treated as a mitigating technical control rather than proof of legitimacy.

Closing Assessment

The service is suitable for ordinary consideration, subject to independent merchant-identity, contractual, and payment-protection checks before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of webway.host.

- The request stayed on webway.host. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by webway.host, across 2 name servers. NOTED
- The registration is paid up to 2026-12-04. NOTED
- The earliest public archive of this site is from 2025-02-11. CLEAR
- It is hosted on Sahdsoft Technologies CC, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about webway.host at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
