Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Wefunder is an investment crowdfunding and fundraising platform that connects founders, syndicates, funds, and individual or institutional investors through private rounds, community rounds, SPVs, fund administration, compliance services, and related capital-raising tools.

Scam/Impersonation Risk

No contradictions were observed across the reviewed pages and technical signals. The homepage presents a coherent investment-platform identity, with no detected phishing, impersonation, malicious-content, or suspicious-page indicators. Its long-established registration, continuous historical presence, strong public footprint, and clean external reputation support the conclusion that this is an established legitimate website.

- Domain registered in 2011 (~14.62 years old), with registration through Namecheap Inc.
- 2,106 archive snapshots spanning 2012–2026 (15 years tracked), with a maximum observed archival gap of one year.
- External reputation checks recorded zero malicious and zero suspicious detections, with no confirmed threat findings.
- The homepage contained no red flags, hidden forms, external password forms, wallet activity, or brand-impersonation indicators.

Regulatory Verification Notes

The site describes a structured financial-services marketplace supporting private rounds, community rounds, syndicates, funds, and SPVs, and presents compliance services, payment and administration functions, investor tools, API access, and explicit investment-risk disclosures. Its pages provide legal-identity information and reference a FINRA affiliation, but the supplied evidence does not establish a specific license number or independently verified authorization; this remains a transparency item for offering-specific review rather than evidence of deception. Registration privacy is an administrative detail, not an identity contradiction.

- Hosted on AS13335 (Cloudflare, Inc., US).
- TLS certificate issued by YE1 (DV), valid to 2026-10-08.
- The homepage identifies products including Private Round, Community Round, Syndicate, Fund, and SPV services.
- The registration record lists privacy service provided by Withheld for Privacy ehf.

What to Verify Next

Confirm any applicable authorization and the referenced FINRA relationship through the relevant official registry before relying on a particular offering. Review the applicable offering documents, risk disclosures, fees, and investor eligibility requirements, and confirm official support channels through an independently obtained company contact route.

- The homepage states that Wefunder handles compliance, payment, and administration for supported fundraising structures.
- The homepage includes explicit investment-risk disclosures and presents separate workflows for founders, syndicates, funds, and investors.

Summary Verdict

Wefunder presents as a legitimate, established, and trustworthy financial-services platform with coherent business purpose, sustained historical continuity, clean external reputation, and no observed contradiction signals. Normal interaction, including account login and standard platform use, is appropriate.

Infrastructure Integrity

Cloudflare CDN and WAF protection place the observed traffic behind CDN edge infrastructure, with all four observed addresses associated with AS13335; the infrastructure is a mitigating security control, although it does not independently prove legitimacy.

Closing Assessment

Prospective users may engage with the platform normally, while applying standard financial due diligence to each individual investment opportunity and its governing documents.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wefunder.com.

- The request stayed on wefunder.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

- The registration is paid up to 2029-12-23. CLEAR
- The earliest public archive of this site is from 2012-06-12. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wefunder.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
