

Is welcon.co.nz legit? TrustSniffer's high-trust assessment: 100/100

welcon.co.nz

Verdict

100

OUT OF 100

HIGH TRUST

welcon.co.nz appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Static informational site for Welcon Group, a specialist business consulting firm describing services for public and private sector clients, contact and company information, and copyright notice.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Welcon.co.nz is an informational corporate website for Welcon Group, a specialist business consulting firm presenting advisory and implementation services for public-sector economic development initiatives and private-sector performance optimisation, with the apparent purpose of attracting professional-services engagements and providing company and contact information.

Scam/Impersonation Risk

No contradictory indicators were observed. The homepage presents a coherent consulting business model, while the examined site behavior shows no login form, sensitive form, hidden form, wallet activity, external submission, or suspected brand impersonation. Available external checks did not identify malicious activity, and the site's apparent legitimacy is consistent with its long-running domain presence; however, the real-world operator remains independently unverified. Evidence:

- The homepage identifies "Welcon Group" and describes business consulting, public-sector economic development, private-sector strategy, implementation, and measurable outcomes.
- Browser behavior recorded zero external posts, zero external XHR activity, no hidden forms, no password forms, and no wallet-provider or wallet-drainer activity.

- The domain was registered in 2009 and is approximately 16.9 years old.
- Historical records contain 40 archive snapshots spanning 2010–2026, covering 17 years.

Regulatory Verification Notes

The site appears to operate as a consulting-services presentation rather than as an online financial or payment service. Its navigation includes Our People, Services, Policies, and Contact Us, and the homepage carries a 2013 copyright notice for Welcon Limited. No license claim or license number is presented in the supplied page content; this is a disclosure point for confirmation only and is not, by itself, evidence of misconduct. The available third-party broker context produced no matching record and should not be treated as a licensing or legal determination. Evidence:

- The homepage is titled “Welcon | Specialist Business Consulting” and describes services for public and private-sector clients rather than online transaction products.
- The site's transport encryption uses a DV certificate issued by YR2, valid to 2026-10-03T05:27:37+00:00.
- Hosting is associated with AS134967, TQL-AS-AP – TopQuality Limited, NZ.
- Domain registration is through Metaname.

What to Verify Next

Before credential or payment interactions, an organisation considering engagement should independently confirm the legal identity of Welcon Limited through the relevant New Zealand corporate registry, establish whether the proposed consulting activity requires any sector-specific licence or registration, and validate the official contact channels through an independently sourced business record. Any commercial engagement should also use documented contract terms, clear invoicing details, and appropriate payment protections. Evidence:

- The site provides Our People, Policies, Services, and Contact Us pages that can be compared with independently sourced corporate records.
- The business model described on the homepage is professional consulting and implementation support, making contract scope, deliverables, and invoicing terms the relevant commercial controls.
- The supplied analysis identifies no online payment workflow or sensitive submission form, so engagement controls should be established through the contracting process.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. This conclusion supports ordinary business interaction while preserving uncertainty about independent confirmation of the real-world operator identity.

Infrastructure Integrity

The site resolves to infrastructure operated by TopQuality Limited in New Zealand under AS134967, with no CDN identified in the observed configuration. Its valid TLS deployment and identifiable hosting route are mitigating technical signals, but infrastructure alone does not establish the operator's identity or legitimacy.

Closing Assessment

Ordinary engagement is proportionate, subject to independent confirmation of the counterparty and normal contract, payment-protection, and credential-handling controls before sensitive commercial activity.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of welcon.co.nz.

- The request stayed on welcon.co.nz. It was not redirected to another domain. CLEAR
- Registration is published under Metaname. CLEAR
- DNS for this domain is served by tqnw.net, across 4 name servers. NOTED
- The earliest public archive of this site is from 2010-05-24. CLEAR
- It is hosted on TQL-AS-AP, from a server in NZ. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about welcon.co.nz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
