

Is wfolio.ru legit? TrustSniffer's high-trust assessment: 100/100

wfolio.ru

Verdict

100

OUT OF 100

HIGH TRUST

wfolio.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Wfolio is a Russian-language SaaS product: website builder and cloud galleries for photographers, offering tiers, free trial, ecommerce and AI-assisted features. The page is informative and marketing-focused with signup/login and pricing information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Wfolio is a Russian-language subscription SaaS platform for photographers, presenting website-building tools, cloud galleries, client delivery features, ecommerce functions, and AI-assisted services through tiered plans and a free-trial model. Its apparent purpose is to help photographers create portfolio sites, share photography securely, and manage related client and sales workflows.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or other contradictory signals were observed. The homepage presents a coherent commercial model centred on website creation, cloud galleries, subscriptions, print-order services, storage, and related photographer tools rather than an abuse-oriented or financial-fraud proposition. The presence of signup and login functions is consistent with the stated SaaS model; testing identified no sensitive form abuse, wallet activity, cloaking, suspicious scripts, or untrusted form destinations. The available reputation checks were clean, and the site's established operating history further supports an apparently legitimate provenance.

EVIDENCE

- The homepage describes Wfolio as a website builder and cloud gallery service for photographers, with subscription tiers, a free trial, client delivery, print orders, storage, and AI-assisted image features.
- The homepage and observed interaction flow contained 3 forms, including signup, login, and contact/support functions, with no sensitive form detected.
- External reputation checks recorded 0 malicious results, 0 suspicious results, and no blacklist detection.
- The domain was registered on 2015-06-30 and is recorded as 11.13 years old, with registration through RU-CENTER-RU and expiry on 2027-06-30.

Regulatory Verification Notes

Wfolio appears to operate as a software service rather than a site presenting itself as a regulated financial intermediary. The supplied marketing and pricing material does not display a regulatory licence or registration number; this is a disclosure and verification point, not evidence of a scam. The available broker-reputation context contains no matching entity, but that absence is contextual only and does not establish licensing or corporate identity. The real-world operator remains independently unverified, although the site's coherent commercial presentation, long-established registration, strong traffic presence, clean reputation, and identifiable transport security are evidence-consistent with an established website.

EVIDENCE

- The site's transport encryption uses a GlobalSign RSA OV SSL CA 2018 certificate with OV validation, subject organisation OOO PERSPEKTIVA, valid through 2026-12-11T09:37:12+00:00.
- The website is served through AS57724, operated by DDOS-GUARD - DDOS-GUARD LTD, RU.
- The homepage and pricing material describe subscription tiers and service features but do not display a licence number or regulatory registration disclosure.
- The site is recorded within the top one million websites, with a traffic position of 24147.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the merchant identity associated with the service and review the applicable subscription, cancellation, refund, and payment-protection terms. The relevant tariff and FAQ pages should be checked for billing mechanics, renewal conditions, storage limits, and treatment of paid print or fulfilment services. Where a regulated activity is contemplated, any applicable authorisation should be confirmed directly with the relevant registry rather than inferred from the site's marketing language.

EVIDENCE

- The tariff and FAQ pages provide the primary source for checking plan terms, billing conditions, and service limitations.
- The site exposes login, signup, and support functions, creating a basis for independently confirming official account and contact channels before sensitive use.
- The site's commercial model includes optional paid services and transaction-related features, making payment-protection and cancellation terms relevant to due diligence.

Summary Verdict

The overall posture is **high trust and low risk**, and no scam or impersonation contradiction was identified. Available evidence is consistent with an established, apparently legitimate SaaS website, while the operator's real-world identity remains not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the observed address belongs to the CDN edge rather than an identified origin candidate. This provides a meaningful mitigation against routine exposure and abuse, but it is an infrastructure control rather than proof of operator legitimacy; the observed hosting provider is DDOS-GUARD - DDOS-GUARD LTD, RU.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate, but credentials or payments should follow independent confirmation of the merchant identity, applicable terms, and available payment protections.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wfolio.ru.

- The request stayed on wfolio.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-06-30. NOTED
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wfolio.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
