- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Whale TV is a corporate streaming-technology website presenting Whale TV, Whale TV+, G-Engine, Whale Framely, developer resources, partner announcements, and support materials; its apparent business model is based on connected-TV products, streaming distribution, partnerships, licensing, and related commercial services.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate/product profile, with named products, partner announcements, developer resources, and no financial, investment, cryptocurrency, or credential-harvesting solicitation. Available reputation checks reported no malicious or suspicious detections, no phishing or impersonation indicators, and no abuse reports associated with the observed hosting context. The available evidence is therefore consistent with an established, apparently legitimate website, although it does not independently verify the real-world operator behind the domain.

EVIDENCE

- The homepage identifies Whale TV, Whale TV+, G-Engine, and Whale Framely as products and links to news, developer, support, and corporate information.
- The homepage contains no login form, password form, hidden form, wallet connection, or sensitive-data submission mechanism; the observed form activity was limited to newsletter signup and cookie consent.
- The domain was registered on 2020-08-17 and is approximately 5.99 years old.
- The site has 74 archive snapshots spanning 2021-12-30 through 2026-06-29, with 6 years tracked.

Regulatory Verification Notes

The site's presented activity is commercial streaming and connected-TV technology rather than a regulated financial service, so no financial license claim was identified as part of the observed business model. The presence of About Us, Who We Are, Legal, Privacy Policy, Terms of Use, Contact, Support, and partner-facing pages provides a substantive corporate information structure, but the available material does not independently establish the legal entity operating the domain. This is an identity and disclosure matter for commercial due diligence, not evidence of scam activity. No broker-dataset match or other third-party reputational warning was identified.

EVIDENCE

- The homepage links to “Who We Are,” “Legal,” “Privacy Policy,” “Terms of Use,” “Contact,” “Support,” and “Partner With Us.”
- The domain registrar is Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn).
- The site is served from AS16509, Amazon.com, Inc., US.
- The site’s TLS certificate is issued by Encryption Everywhere DV TLS CA - G2, uses DV validation, and is valid through 2027-03-10.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the contracting legal entity, review the applicable terms and privacy materials, and establish which support and payment channels are official. If a subscription, hardware purchase, or other paid service is contemplated, ordinary checks of merchant identity, cancellation or return arrangements, and payment-protection options should be completed through independent business records or an offline corporate contact.

EVIDENCE

- The homepage provides separate commercial pathways for products, developers, partners, support, and press inquiries.
- The site offers Terms of Use and Privacy Policy pages for review before commercial engagement.
- The site’s business presentation is product-led and corporate, with news and partner content rather than investment or financial-service solicitation.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate corporate website. No scam, phishing, impersonation, or other contradictory signal was observed, but the real-world operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by Amazon CloudFront CDN/WAF infrastructure, with observed traffic terminating on Amazon edge servers rather than exposing an origin candidate. This is a mitigating infrastructure control that can improve resilience and reduce direct origin exposure, but it is not, by itself, proof of corporate legitimacy.

Closing Assessment

Normal informational and business-evaluation activity is proportionate; independent confirmation of the contracting entity and payment protections should precede credential submission or paid engagement.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [whaletv.com](#).

- The request stayed on [whaletv.com](#). It was not redirected to another domain. CLEAR
- Registration is published under Alibaba Cloud Computing Ltd. d/b/a HiChina ([www.net.cn](#)). CLEAR
- DNS for this domain is served by [awsdns-15.org](#), across 4 name servers. NOTED
- The registration is paid up to 2030-08-17. CLEAR
- The earliest public archive of this site is from 2021-12-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [whaletv.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
