

Is whitehouse.gov legit? TrustSniffer's high-trust assessment: 100/100

whitehouse.gov

Verdict

100

OUT OF 100

HIGH TRUST

whitehouse.gov appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Official-style White House page containing news, initiatives, administration info, app download links, social links, and subscription options. Appears to be an established government informational site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a public-facing White House government information and civic-engagement website presenting administration news, presidential actions, initiatives, contact channels, livestreams, social-media links, subscriptions, and official mobile-app downloads. Its apparent purpose is public communication and civic engagement rather than commercial transactions.

Scam/Impersonation Risk

No scam, phishing, blacklist, or identity-contradiction signals were observed. The homepage's government-service structure, administration content, official-style navigation, and links to mainstream app stores and established social platforms are consistent with the stated public-service purpose. The site also presents no login form, hidden sensitive form, wallet interaction, or other abuse mechanism. Available evidence therefore supports an apparently legitimate, low-risk posture, while independent confirmation of the real-world operator remains incomplete.

EVIDENCE

- The homepage is classified as a government/public-service page and contains administration news, initiatives, contact functions, livestreams, subscriptions, and app-download links.
- The homepage contains no login form, hidden form, password-external form, or wallet-drainer activity.
- Reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the site is ranked 927 globally and is within the top 1 million sites.

Regulatory Verification Notes

The Administration, Contact, Privacy Policy, and related institutional pages provide a coherent governmental context and identify the Executive Office of the President in the registration record. The site is not presented as a commercial or financial service and does not disclose a commercial license or registration number; this is a regulatory-transparency point to confirm only if a proposed interaction involves a regulated activity. The available evidence is consistent with an established, apparently legitimate website, but it does not independently prove the real-world operator identity.

EVIDENCE

- The domain was registered on 1997-10-02 and is approximately 28.89 years old; the registrar is get.gov.
- The registration record lists “Executive Office of the President” as the organization.
- The site is served from AS2635 (AUTOMATTIC - Automattic, Inc, US).
- TLS is issued by YE2 at DV validation level and is valid to 2026-11-02T18:59:46+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise or prospective user should confirm the domain and institutional status through an independent government directory or an offline government contact route. Any mobile application should be selected from the official app-store listing reached through the site, and the applicable privacy, subscription, and contact terms should be reviewed before enrollment. Where a proposed activity falls within a regulated category, the responsible agency or registry should be confirmed independently.

EVIDENCE

- The site provides Administration, Contact, Privacy Policy, and internship-related pages for institutional and engagement context.
- The homepage provides app-download destinations through Apple’s App Store and Google Play.
- The site offers a newsletter subscription and search forms rather than payment or sensitive-account forms.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate public-service website with a high overall trust posture. No scam or impersonation contradictions were observed. The posture is reassuring for ordinary informational use, subject to the remaining uncertainty around independently verified operator identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure and common delivery-layer abuse. The observed addresses were CDN edge addresses, and no origin candidate was identified in the analysis; this supports infrastructure resilience but is not, by itself, proof of legitimacy.

Closing Assessment

Normal informational use is proportionate, while independent institutional, policy, and payment-protection checks should precede credential or payment interactions.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Identity verified on page
- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of whitehouse.gov.

- The request stayed on whitehouse.gov. It was not redirected to another domain. CLEAR
- Registration is published under get.gov. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-17. NOTED
- It is hosted on AUTOMATTIC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about whitehouse.gov at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
