

Is wielixclient.net a scam? TrustSniffer's high-risk assessment: 0/100

wielixclient.net

Verdict

0

OUT OF 100

CRITICAL RISK

wielixclient.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-24 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page for Wielix Client 26.2: a free Minecraft (Fabric) mod for Hypixel Skyblock offering 47 modules including auto dungeons, farming macros, item duplication exploit, anti-rat protection, and Kuudra automation. Emphasizes undetectability and zero bans; provides download and install instructions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What wielixclient.net served when TrustSniffer captured it on 2026-09-24. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as a free software-download site for a Minecraft modification, offering visitors a downloadable client, installation guidance, and a collection of game-related automation features.

Scam/Impersonation Risk

The site presents a materially elevated risk for sensitive interaction. Its homepage distributes a direct Java archive and promotes automation, item duplication, anti-detection capabilities, and claims of complete undetectability and zero bans. It also advertises unsupported performance and safety assertions, including 45,000+ active users, zero recorded bans, and broad automation coverage, without substantiating those claims. External reputation evidence includes a confirmed blacklist hit and additional security detections, although separate checks reported no malicious result from Google Safe Browsing, no AbuseIPDB reports, and no direct malicious verdict from the evaluated VirusTotal result. The confirmed blacklist status remains decisive. No conflicting legal-entity names, brand impersonation, or phishing form were identified, but the combination of the

blacklist finding, direct executable distribution, and claim-evidence disparity warrants treating downloads and other sensitive interaction as unsafe. Evidence:

- The homepage offers a direct 6.1 MB Java archive and installation instructions for the advertised client.
- The homepage claims 45,000+ active users and zero bans while promoting undetectability and automation.
- External reputation checks record a confirmed blacklist hit and two suspicious detections; Google Safe Browsing reports no malicious result.

Regulatory Verification Notes

The site is a software-distribution project rather than an identified regulated financial service, but its legal and governance disclosures are unclear. The available material does not establish a real-world operator identity, corporate entity, licensing position, or accountable publisher, and the homepage does not provide a clear legal-status framework for the distributed software. This is a transparency and accountability gap rather than independent proof of fraud; however, it prevents the operator from being treated as verified. The domain is registered through Web Commerce Communications Limited dba WebNic.cc, while the transport certificate is only domain-validated. Evidence:

- Domain registration records show creation on 2026-08-07 and an age of approximately 0.13 years.
- The site is served from AS13335, CLOUDFLARENET—Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-11-08 07:04:23 UTC.
- The homepage contains no stated license authority or license number and does not clearly identify a responsible legal entity.

What to Verify Next

Before any interaction beyond passive viewing, an independent source should confirm the operator's identity and the authenticity of the software distribution channel. The downloadable file should be assessed in an isolated environment using independent malware analysis, with its publisher, cryptographic hash, and release history checked against a separately established official source. Any claimed user base, safety record, or affiliation should be corroborated through independent community or platform records rather than the site's own counters. Evidence:

- The homepage is the sole supplied source for the software claims, user counters, safety assertions, and installation guidance.
- The page analysis records direct file downloads and promotion of undetected cheating software.
- No external social domains, external links, or structured publisher information were identified on the analyzed page.

Summary Verdict

The available evidence supports a **critical trust posture** with substantial risk around downloads, credentials, and other sensitive interaction. The site's legitimacy and operator identity remain unverified, and the confirmed external reputation contradiction outweighs the otherwise ordinary technical presentation.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge servers rather than an independently visible origin. This provides a mitigating layer against direct exposure of the hosting environment, but it does not establish legitimacy and cannot offset the external reputation findings.

Closing Assessment

Sensitive interaction should not proceed unless the software, operator, and distribution channel are independently authenticated through trusted sources and the file has passed controlled security analysis.

Written analysis generated 2026-09-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of wielixclient.net.

- The request stayed on wielixclient.net. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications Limited dba WebNic.cc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wielixclient.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
