Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

wiflix.re is a parked domain landing page presenting the domain as potentially available for sale, with links to Terms of Service and Privacy Policy; it does not present an active product, transaction flow, or financial service to visitors.

Scam/Impersonation Risk

A confirmed blacklist-based contradiction and multiple external threat detections create a **critical risk posture for sensitive interaction**, despite the page itself being a minimal, non-interactive parking page with no login form, payment flow, or active solicitation. The blacklist signal is directed at the domain, while the separate abuse report concerns a shared Trellian provider IP and is expressly discounted because it may apply to shared infrastructure rather than this website specifically. No identity contradiction or brand impersonation was observed, but the available evidence does not support treating the domain as safe for credentials, account access, payments, or other sensitive activity.

EVIDENCE

- The homepage states that the domain may be for sale and contains no active service, transaction, login, or sensitive-input form.
- External reputation checks recorded 4 malicious and 2 suspicious detections, with a confirmed blacklist status.
- The hosting IP, 103.224.182.253, has 1 abuse report; the attribution is shared infrastructure and the report is discounted for that reason.
- Domain provenance records registration continuity of 5.04312114989733 years; archival coverage records 0 snapshots, first seen 2021-08-03 and last seen 2026-04-12, across 6 years tracked.

Regulatory Verification Notes

The site functions as a domain-sale landing page rather than a regulated service, so no licensing claim or regulated financial offering is presented for evaluation. Its legal and ownership disclosures are limited to Terms of Service and Privacy Policy links, and the real-world operator remains unverified; this is an identity and governance transparency concern, not an identity contradiction. The absence of an active commercial or financial service reduces the immediate regulatory surface, but it does not offset the external threat findings.

EVIDENCE

- The homepage identifies the property only as wiflix.re and says it may be for sale.
- The homepage provides Terms of Service and Privacy Policy links but no identifiable operating entity or licence number.
- The domain registrar is Tool Domains EOOD, with expiry recorded as 2026-10-03T08:32:00Z.
- Hosting is through AS133618, TRELLIAN-AS-AP - Trellian Pty. Limited, AU; the TLS certificate is DV, issued by YR2, valid to 2026-10-06T10:08:33+00:00.

What to Verify Next

Before any sensitive interaction, an organisation should confirm through an independent offline or previously trusted channel that the domain is intentionally associated with the claimed business or intended transaction. Any proposed domain purchase should be handled through a recognised registrar or escrow process, with the counterparty and payment destination independently established. If the domain later presents a regulated service, its legal operator and licence should be checked directly against the relevant official registry before engagement.

EVIDENCE

- The homepage offers only a domain-sale inquiry and does not establish a verified counterparty.
- The legal-page links provide terms and privacy information but do not independently establish operator identity.
- Browser testing recorded 0 external XHR/fetch requests, 0 hidden forms, 0 wallet-connection runs, and 0 suspicious inline scripts across 2 successful runs.

Summary Verdict

The website should be treated as a critical sensitive-interaction risk. The parked-page presentation is technically low in interactive complexity, but the confirmed external reputation contradiction dominates the assessment, and operator identity is not independently verified. Read-only observation of the landing page is the only proportionate use supported by the available evidence.

Infrastructure Integrity

The site resolves directly to a likely origin IP rather than a detected trusted CDN edge, and is hosted on AS133618, TRELLIAN-AS-AP - Trellian Pty. Limited, AU. TLS is enabled with a DV certificate issued by YR2; this protects transport confidentiality but does not establish operator legitimacy or offset the external reputation findings.

Closing Assessment

Sensitive actions should not be performed through this domain. Any legitimate business need should be redirected through an independently verified, established channel and supported by controlled payment, credential, and monitoring procedures.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about wiflix.re at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
